Economy ::

Economy - overview:

Since independence in 1976, per capita output in this Indian Ocean archipelago has expanded to roughly seven times the pre-independence, near-subsistence level, moving the island into the upper-middle income group of countries. Growth has been led by the tourist sector, which employs about 30% of the labor force and provides more than 70% of hard currency earnings, and by tuna fishing. In recent years, the government has encouraged foreign investment to upgrade hotels and other services. At the same time, the government has moved to reduce the dependence on tourism by promoting the development of farming, fishing, and small-scale manufacturing. GDP grew about 7-8% per year in 2006-07, driven by tourism and a boom in tourism-related construction. The Seychelles rupee was allowed to depreciate in 2006 after being overvalued for years and fell by 10% in the first 9 months of 2007. Despite these actions, the Seychelles economy has struggled to maintain its gains and in 2008 suffered from food and oil price shocks, a foreign exchange shortage, high inflation, large financing gaps, and the global recession. In July 2008 the government defaulted on a Euro amortizing note worth roughly US\$80 million, leading to a downgrading of Seychelles credit rating, but in October 2010 the EU approved a \$2.9 million grant as part of a larger four-year program for Seychelles. In response to Seychelles successful implementation of tighter monetary and fiscal policies, the IMF upgraded Seychelles to a three-year extended fund facility (EFF) of \$31 million in December 2009. In 2008, GDP fell more than 1% due to declining tourism, but

the economy recovered in 2009-10 with a notable increase in tourist numbers for 2010.

Introduction ::

Background:

Democracy is slowly being reestablished after the civil war from 1991 to 2002 that resulted in tens of thousands of deaths and the displacement of more than 2 million people (about one-third of the population). The military, which took over full responsibility for security following the departure of UN peacekeepers at the end of 2005, is increasingly developing as a guarantor of the country's stability. The armed forces remained on the sideline during the 2007

presidential election, but still look to the UN Integrated Office in Sierra Leone (UNIOSIL) - a civilian UN mission - to support efforts to consolidate peace. The new government's priorities include furthering development, creating jobs, and stamping out endemic corruption.

Economy ::

Economy - overview:

Sierra Leone is an extremely poor nation with tremendous inequality in income distribution. While it possesses substantial mineral, agricultural, and fishery resources, its physical and social infrastructure has yet to recover from the civil war, and serious social disorders continue to hamper economic development. Nearly half of the working-age population engages in subsistence agriculture. Manufacturing consists mainly of the processing of raw materials and of light manufacturing for the domestic market. Alluvial diamond mining remains the major source of hard currency earnings accounting for nearly half of Sierra Leone's exports. The fate of the economy depends upon the maintenance of domestic peace and the continued receipt of substantial aid from abroad, which is essential to offset the severe trade imbalance and supplement government revenues. The IMF has completed a Poverty Reduction and Growth Facility program that helped stabilize economic growth and reduce inflation and in 2010 approved a new program worth \$45 million over three years. Political stability has led to a revival of economic activity such as the rehabilitation of bauxite and rutile mining, which are set to benefit from planned tax incentives. A number of offshore oil discoveries were announced in 2009 and 2010. The development on these reserves, which could be significant, is still several years away.

Singapore

Introduction ::

Background:

Singapore was founded as a British trading colony in 1819. It joined the Malaysian Federation in 1963 but separated two years later and became independent. Singapore subsequently became one of the world's most prosperous countries with strong international trading links (its port is one of the world's busiest in terms of tonnage handled) and with per capita GDP equal to that of the leading nations of Western Europe.

Economy ::

Economy - overview:

Singapore has a highly developed and successful free-market economy. It enjoys a remarkably open and corruption-free

environment, stable prices, and a per capita GDP higher than that of most developed countries. The economy depends heavily on exports, particularly in consumer electronics, information technology products, pharmaceuticals, and on a growing financial services sector. Real GDP growth averaged 6.9% between 2004 and 2008. The economy contracted 1.3% in 2009 as a result of the global financial crisis, but rebounded nearly 15% in 2010, on the strength of renewed exports. Over the longer term, the government hopes to establish a new growth path that focuses on raising productivity growth, which has sunk to 1% per year in the last decade. Singapore has attracted major investments in pharmaceuticals and medical technology production and will continue efforts to establish Singapore as Southeast Asia's financial and high-tech hub.

Transnational Issues ::

Disputes - international:

disputes persist with Malaysia over deliveries of fresh water to Singapore, Singapore's extensive land reclamation works, bridge construction, and maritime boundaries in the Johor and Singapore Straits; in 2008, ICJ awards sovereignty of Pedra Branca (Pulau Batu Puteh/Horsburgh Island) to Singapore, and Middle Rocks to Malaysia, but does not rule on maritime regimes, boundaries, or disposition of South Ledge; Indonesia and Singapore continue to work on finalization of their 1973 maritime boundary agreement by defining unresolved areas north of Indonesia's Batam Island; piracy remains a problem in the Malacca Strait

Illicit drugs:

drug abuse limited because of aggressive law enforcement efforts; as a transportation and financial services hub, Singapore is vulnerable, despite strict laws and enforcement, as a venue for money laundering

Sint Maarten

Introduction ::

Background:

Although sighted by Christopher COLUMBUS in 1493 and claimed for Spain, it was the Dutch who occupied the island in 1631 and set about exploiting its salt deposits. The Spanish retook the island in 1633, but continued to be harassed by the Dutch. The Spanish finally relinquished the island of Saint Martin to the French and Dutch, who divided it amongst themselves in 1648. The establishment of cotton, tobacco, and sugar plantations dramatically expanded slavery on the

island in the 18th and 19th centuries; the practice was not abolished in the Dutch half until 1863. The island's economy declined until 1939 when it became a free port; the tourism industry was dramatically expanded beginning in the 1950s. In 1954, Sint Maarten and several other Dutch Caribbean possessions became part of the Kingdom of the Netherlands as the Netherlands Antilles. In a 2000 referendum, the citizens of Sint Maarten voted to become a self-governing country within the Kingdom of the Netherlands. The change in status became effective in October of 2010 with the dissolution of the Netherlands Antilles.

Flag description:

two equal horizontal bands of red (top) and blue with a white isosceles triangle based on the hoist side; the center of the triangle displays the Sint Maarten coat of arms; the arms consist of an orange-bordered blue shield prominently displaying the white court house in Philipsburg, as well as a bouquet of yellow sage (the national flower) in the upper left, and the silhouette of a Dutch-French friendship monument in the upper right; the shield is surmounted by a yellow rising sun in front of which is a Brown Pelican in flight; a yellow scroll below the shield bears the motto: SEMPER PROGREDIENS (Always Progressing); the three main colors are identical to those on the Dutch flag

note: the flag somewhat resembles that of the Philippines, but with the main red and blue bands reversed; the banner more closely evokes the wartime Philippine flag

National anthem:

name: "O Sweet Saint Martin's Land"

lyrics/music: Gerard KEMPS

note: the song, written in 1958, is used as an unofficial anthem for the entire island (both French and Dutch sides); as a collectivity of France, in addition to the local anthem, "La Marseillaise" is official on the French side (see France); as a constituent part of the Kingdom of the Netherlands, in addition to the local anthem, "Het Wilhelmus" is official on the Dutch side (see Netherlands)

Economy ::

Economy - overview:

The economy of Sint Maarten centers around tourism with nearly four-fifths of the labor force engaged in this sector. Over one million visitors come to the island each year - 1.3 million in 2008 - with most arriving through the Princess Juliana International Airport. Cruise ships and yachts also call on Sint Maarten's numerous ports and harbors. No significant agriculture and limited local fishing means that almost all food must be imported. Energy resources and manufactured goods are also imported. Sint Maarten had the highest per capita income among the five islands that formerly comprised the Netherlands Antilles.

Introduction ::

Background:

The dissolution of the Austro-Hungarian Empire at the close of World War I allowed the Slovaks to join the closely related Czechs to form Czechoslovakia. Following the chaos of World War II, Czechoslovakia became a Communist nation within Soviet-dominated Eastern Europe. Soviet influence collapsed in 1989 and Czechoslovakia once more became free. The Slovaks and the Czechs agreed to separate peacefully on 1 January 1993. Slovakia joined both NATO and the EU in the spring of 2004 and the euro area on 1 January 2009.

note: adopted 1993, in use since 1844; the anthem's music is based on the Slovak folk song "Kopala studienku"

Economy ::

Economy - overview:

Slovakia has made significant economic reforms since its separation from the Czech Republic in 1993. Reforms to the taxation, healthcare, pension, and social welfare systems helped Slovakia to consolidate its budget and get on track to join the EU in 2004 and to adopt the euro in January 2009. Major privatizations are nearly complete, the banking sector is almost entirely in foreign hands, and the government has helped facilitate a foreign investment boom with business friendly policies such as labor market liberalization and a 19% flat tax. Foreign investment in the automotive and electronic sectors has been strong. Slovakia's economic growth exceeded expectations in 2001-08 despite the general European slowdown. Unemployment, at an unacceptable 18% in 2003-04, dropped to 7.7% in 2008 but remains the economy's Achilles heel. FICO's cabinet was careful to keep a lid on spending in order to meet euro adoption criteria and has focused on regulating energy and food prices instead. To maintain a stable operating environment for investors, the European Bank for Reconstruction and Development advised the Slovak government to refrain from intervening in important sectors of the economy. However, Bratislava's approach to mitigating the economic slowdown has

included substantial government intervention and the option to nationalize strategic companies. Slovakia was admitted to the euro zone in January 2009. RADICOVA's government, in power since July 2010, has allowed the budget deficit to rise slightly, to 8.2% of GDP in 2010. GDP fell nearly 5% in 2009 before gaining back 4% in 2010, and unemployment rose above 12% in 2010, as the global recession impacted many segments of the economy.

Slovenia

>

Introduction ::

Background:

The Slovene lands were part of the Austro-Hungarian Empire until the latter's dissolution at the end of World War I. In 1918, the Slovenes joined the Serbs and Croats in forming a new multinational state, which was named Yugoslavia in 1929. After World War II, Slovenia became a republic of the renewed Yugoslavia, which though Communist, distanced itself from Moscow's rule. Dissatisfied with the exercise of power by the majority Serbs, the Slovenes succeeded in

establishing their independence in 1991 after a short 10-day war. Historical ties to Western Europe, a strong economy, and a stable democracy have assisted in Slovenia's transformation to a modern state. Slovenia acceded to both NATO and the EU in the spring of 2004; it joined the eurozone in 2007.

Flag description:

three equal horizontal bands of white (top), blue, and red, derive from the medieval coat of arms of the Duchy of Carniola; the Slovenian seal (a shield with the image of Triglav, Slovenia's highest peak, in white against a blue background at the center; beneath it are two wavy blue lines depicting seas and rivers, and above it are three six-pointed stars arranged in an inverted triangle, which are taken from the coat of arms of the Counts of Celje, the great Slovene dynastic house of the late 14th and early 15th centuries) appears in the upper hoist side of the flag centered on the white and blue bands

National anthem:

name: "Zdravljica" (A Toast)

lyrics/music: France PRESEREN/Stanko PREMRL

note: adopted 1989; the anthem was originally written in 1848; the full poem, whose seventh verse is used as the anthem, speaks of pan-Slavic nationalism

Economy ::

Economy - overview:

Slovenia became the first 2004 European Union entrant to adopt the euro (on 1 January 2007) and has become a model of economic success and stability for the region. With the highest per capita GDP in Central Europe, Slovenia has excellent infrastructure, a well-educated work force, and a strategic location between the Balkans and Western Europe. Privatization has lagged since 2002, and the economy has one of highest levels of state control in the EU. Structural reforms to improve the business environment have allowed for somewhat greater foreign participation in Slovenia's economy and have helped to lower unemployment. In March 2004, Slovenia became the first transition country to graduate from borrower status to donor partner at the World Bank. In December 2007, Slovenia was invited to begin the

accession process for joining the OECD. Despite its economic success, foreign direct investment (FDI) in Slovenia has lagged behind the region average, and taxes remain relatively high. Furthermore, the labor market is often seen as inflexible, and legacy industries are losing sales to more competitive firms in China, India, and elsewhere. In 2009, the world recession caused the economy to contract - through falling exports and industrial production - by more than 8%, and unemployment to rise above 9%. Although growth resumed in 2010, the unemployment rate continued to rise, topping 10%.

Transnational Issues ::

Disputes - international:

the Croatia-Slovenia land and maritime boundary agreement, which would have ceded most of Piran Bay and maritime access to Slovenia and several villages to Croatia, remains unratified and in dispute; Slovenia also protests Croatia's 2003 claim to an exclusive economic zone in the Adriatic; as a member state that forms part of the EU's external border, Slovenia has implemented the strict Schengen border rules to curb illegal migration and commerce through southeastern Europe while encouraging close cross-border ties with Croatia

Illicit drugs:

Solomon Islands

(map)

Introduction ::

Background:

The UK established a protectorate over the Solomon Islands in the 1890s. Some of the most bitter fighting of World War II occurred on this archipelago. Self-government was achieved in 1976 and independence two years later. Ethnic violence, government malfeasance, and endemic crime have undermined stability and civil society. In June 2003, then Prime Minister Sir Allan KEMAKEZA sought the assistance of Australia in reestablishing law and order; the following month, an Australian-led multinational force arrived to restore peace and disarm ethnic militias. The Regional Assistance Mission to the Solomon Islands (RAMSI) has generally been effective in restoring law and order and rebuilding government institutions.

Economy ::

Economy - overview:

The bulk of the population depends on agriculture, fishing, and forestry for at least part of its livelihood. Most manufactured goods and petroleum products must be imported. The islands are rich in undeveloped mineral resources such as lead, zinc, nickel, and gold. Prior to the arrival of RAMSI, severe ethnic violence, the closing of key businesses, and an empty government treasury culminated in economic collapse. RAMSI's efforts to restore law and order and economic stability have led to modest growth as the economy rebuilds.

Somalia

Introduction ::

Background:

Britain withdrew from British Somaliland in 1960 to allow its protectorate to join with Italian Somaliland and form the new nation of Somalia. In 1969, a coup headed by Mohamed SIAD Barre ushered in an authoritarian socialist rule characterized by the persecution, jailing and torture of political opponents and dissidents. After the regime's collapse early in 1991, Somalia descended into turmoil, factional fighting, and anarchy. In May 1991, northern clans declared

an independent Republic of Somaliland that now includes the administrative regions of Awdal, Woqooyi Galbeed, Togdheer, Sanaag, and Sool. Although not recognized by any government, this entity has maintained a stable existence and continues efforts to establish a constitutional democracy, including holding municipal, parliamentary, and presidential elections. The regions of Bari, Nugaal, and northern Mudug comprise a neighboring semi-autonomous state of Puntland, which has been self-governing since 1998 but does not aim at independence; it has also made strides toward reconstructing a legitimate, representative government but has suffered some civil strife. Puntland disputes its border with Somaliland as it also claims portions of eastern Sool and Sanaag. Beginning in 1993, a two-year UN humanitarian effort (primarily in the south) was able to alleviate famine conditions, but when the UN withdrew in 1995, having suffered significant casualties, order still had not been restored. In 2000, the Somalia National Peace Conference (SNPC) held in Djibouti resulted in the formation of an interim government, known as the Transitional National Government (TNG). When the TNG failed to establish adequate security or governing institutions, the Government of Kenya, under the auspices of the Intergovernmental Authority on Development (IGAD), led a subsequent peace process that concluded in October 2004 with the election of Abdullahi YUSUF Ahmed as President of a second interim government, known as the Transitional Federal Government (TFG) of the Somali Republic. The TFG included a 275-member parliamentary body, known as the Transitional Federal Parliament (TFP). President YUSUF resigned late in 2008 while United Nations-sponsored talks between the TFG and the opposition Alliance for the Re-Liberation of Somalia (ARS) were underway in Djibouti. In January 2009, following the creation of a TFG-ARS unity government, Ethiopian military forces, which had entered Somalia in December 2006 to support the TFG in the face of advances by the opposition Islamic Courts Union (ICU), withdrew from the country. The TFP was increased to 550 seats with the addition of 200 ARS and 75 civil society members of parliament. The expanded parliament elected Sheikh SHARIF Sheikh Ahmed, the former CIC and ARS chairman as president on 31 January 2009, in Djibouti. Subsequently, President SHARIF appointed Omar Abdirashid ali SHARMARKE, son of a former president of Somalia, as prime minister on 13 February 2009. SHARMARKE resigned in September 2010 and was replaced by Mohamed Abdullahi MOHAMED, aka Farmajo, a dual US-Somali citizen that lived in the United States from 1985 until his return to Somalia in October 2010. The creation of the TFG was based on the Transitional Federal Charter (TFC), which outlines a five-year mandate leading to the establishment of a new Somali constitution

and a transition to a representative government following national elections. However, in January 2009 the TFP amended the TFC to extend TFG's mandate until 2011.

Economy ::

Economy - overview:

Despite the lack of effective national governance, Somalia has maintained a healthy informal economy, largely based on livestock, remittance/money transfer companies, and telecommunications. Agriculture is the most important sector with livestock normally accounting for about 40% of GDP and more than 50% of export earnings. Nomads and semi-pastoralists, who are dependent upon livestock for their livelihood, make up a large portion of the population. Livestock, hides, fish, charcoal, and bananas are Somalia's principal exports, while sugar, sorghum, corn, qat, and machined goods are the principal imports. Somalia's small industrial sector, based on the processing of agricultural products, has largely been looted and the machinery sold as scrap metal. Somalia's service sector also has grown. Telecommunication firms provide wireless services in most major cities and offer the lowest international call rates on the continent. In the absence of a formal banking sector, money transfer/remittance services have sprouted throughout the country, handling up to \$1.6 billion in remittances annually. Mogadishu's main market offers a variety of goods from food to the newest electronic gadgets. Hotels continue to operate and are supported with private-security militias. Due to armed attacks on and threats to humanitarian aid workers, the World Food Programme partially suspended its operations in southern Somalia in early January 2010 pending improvement in the security situation. Somalia's arrears to the IMF have continued to grow.

Transnational Issues ::

Disputes - international:

Ethiopian forces invaded southern Somalia and routed Islamist Courts

from Mogadishu in January 2007; "Somaliland" secessionists provide port facilities in Berbera to landlocked Ethiopia and have established commercial ties with other regional states; "Puntland" and "Somaliland" "governments" seek international support in their secessionist aspirations and overlapping border claims; the undemarcated former British administrative line has little meaning as a political separation to rival clans within Ethiopia's Ogaden and southern Somalia's Oromo region; Kenya works hard to prevent the clan and militia fighting in Somalia from spreading south across the border, which has long been open to nomadic pastoralists

Refugees and internally displaced persons:

IDPs: 1.1 million (civil war since 1988, clan-based competition for resources) (2007)

Introduction ::

Background:

Dutch traders landed at the southern tip of modern day South Africa in 1652 and established a stopover point on the spice route between the Netherlands and the Far East, founding the city of Cape Town. After the British seized the Cape of Good Hope area in 1806, many of the Dutch settlers (the Boers) trekked north to found their own republics. The discovery of diamonds (1867) and gold (1886) spurred wealth and immigration and intensified the subjugation of the native

inhabitants. The Boers resisted British encroachments but were defeated in the Boer War (1899-1902); however, the British and the Afrikaners, as the Boers became known, ruled together beginning in 1910 under the Union of South Africa, which became a republic in 1961 after a whites-only referendum. In 1948, the National Party was voted into power and instituted a policy of apartheid - the separate development of the races - which favored the white minority at the expense of the black majority. The African National Congress (ANC) led the opposition to apartheid and many top ANC leaders, such as Nelson MANDELA, spent decades in South Africa's prisons. Internal protests and insurgency, as well as boycotts by some Western nations and institutions, led to the regime's eventual willingness to negotiate a peaceful transition to majority rule. The first multi-racial elections in 1994 brought an end to apartheid and ushered in majority rule under an ANC-led government. South Africa since then has struggled to address apartheid-era imbalances in decent housing, education, and health care. ANC infighting, which has grown in recent years, came to a head in September 2008 when President Thabo MBEKI resigned, and Kgalema MOTLANTHE, the party's General-Secretary, succeeded him as interim president. Jacob ZUMA became president after the ANC won general elections in April 2009. In January 2011, South Africa assumed a nonpermanent seat on the UN Security Council for the 2011-12 term.

Flag description:

two equal width horizontal bands of red (top) and blue separated by a central green band that splits into a horizontal Y, the arms of which end at the corners of the hoist side; the Y embraces a black isosceles triangle from which the arms are separated by narrow yellow bands; the red and blue bands are separated from the green band and its arms by narrow white stripes; the flag colors do not have any official symbolism, but the Y stands for the "convergence of diverse elements within South African society, taking the road ahead in unity"; black, yellow, and green are found on the flag of the African National Congress, while red, white, and blue are the colors in the flags of the Netherlands and the UK, whose settlers ruled South Africa during the colonial era

note: the South African flag is the only national flag to display six colors as part of its primary design

National anthem:

name: "National Anthem of South Africa"

lyrics/music: Enoch SONTONGA and Cornelius Jacob LANGENHOVEN/Enoch SONTONGA and Marthinus LOURENS de Villiers

note: adopted 1994; the anthem is a combination of "N'kosi Sikelel' iAfrica" (God Bless Africa) and "Die Stem van Suid Afrika" (The Call of South Africa), which were respectively the anthems of the non-white and white communities under apartheid; the official lyrics contain a mixture of Xhosa, Zulu, Sesotho, Afrikaans, and English; the music incorporates the melody used in the Tanzanian and Zambian anthems

Economy ::

Economy - overview:

South Africa is a middle-income, emerging market with an abundant supply of natural resources; well-developed financial, legal, communications, energy, and transport sectors; a stock exchange that is the 18th largest in the world; and modern infrastructure supporting a relatively efficient distribution of goods to major urban centers throughout the region. At the end of 2007, South Africa began to experience an electricity crisis. State power supplier Eskom encountered problems with aged plants, necessitating "load-shedding" cuts to residents and businesses in the major cities. Growth was robust from 2004 to 2007 as South Africa reaped the benefits of macroeconomic stability and a global commodities boom, but began to slow in the second half of 2007 due to the electricity crisis and the subsequent global financial crisis' impact on commodity prices and demand. GDP fell nearly 2% in 2009. Unemployment remains high and outdated infrastructure has constrained growth. Daunting economic problems remain from the apartheid era - especially poverty, lack of economic empowerment among the disadvantaged groups, and a shortage of public transportation. South Africa's former economic policy was fiscally conservative, focusing on controlling inflation, and attaining a budget surplus. The current government largely follows the same prudent policies, but must contend with the impact of the global crisis and is facing growing pressure from special interest groups to use state-owned enterprises to deliver basic services to low-income areas and to increase job growth. More than one-quarter of South Africa's population currently receives social grants.

Transnational Issues ::

Disputes - international:

South Africa has placed military along the border to apprehend the thousands of Zimbabweans fleeing economic dysfunction and political persecution; as of January 2007, South Africa also supports large numbers of refugees and asylum seekers from the Democratic Republic of the Congo (33,000), Somalia (20,000), Burundi (6,500), and other states in Africa (26,000); managed dispute with Namibia over the location of the boundary in the Orange River; in 2006, Swazi king advocates resort to ICJ to claim parts of Mpumalanga and KwaZulu-Natal from South Africa

Refugees and internally displaced persons:

refugees (country of origin): 10,772 (Democratic Republic of Congo); 7,818 (Somalia); 5,759 (Angola) (2007)

Illicit drugs:

transshipment center for heroin, hashish, and cocaine, as well as a major cultivator of marijuana in its own right; cocaine and heroin consumption on the rise; world's largest market for illicit methaqualone, usually imported illegally from India through various

east African countries, but increasingly producing its own synthetic drugs for domestic consumption; attractive venue for money launderers given the increasing level of organized criminal and narcotics activity in the region and the size of the South African economy

South Georgia and South Sandwich Islands

>

Introduction ::

Background:

The islands, which have large bird and seal populations, lie approximately 1,000 km east of the Falkland Islands and have been under British administration since 1908 - except for a brief period in 1982 when Argentina occupied them. Grytviken, on South Georgia, was a 19th and early 20th century whaling station. Famed explorer Ernest SHACKLETON stopped there in 1914 en route to his ill-fated

attempt to cross Antarctica on foot. He returned some 20 months later with a few companions in a small boat and arranged a successful rescue for the rest of his crew, stranded off the Antarctic Peninsula. He died in 1922 on a subsequent expedition and is buried in Grytviken. Today, the station houses scientists from the British Antarctic Survey. Recognizing the importance of preserving the marine stocks in adjacent waters, the UK, in 1993, extended the exclusive fishing zone from 12 nm to 200 nm around each island.

Flag description:

blue, with the flag of the UK in the upper hoist-side quadrant and the South Georgia and South Sandwich Islands coat of arms centered on the outer half of the flag; the coat of arms features a shield with a golden lion rampant, holding a torch; the shield is supported by a fur seal on the left and a Macaroni penguin on the right; a reindeer appears above the crest, and below the shield on a scroll is the motto LEO TERRAM PROPRIAM PROTEGAT (Let the Lion Protect its Own Land)); the lion with the torch represents the UK and discovery; the background of the shield, blue and white estoiles, are found in the coat of arms of James Cook, discoverer of the islands; all the outer supporting animals represented are native to the islands

Economy ::

Economy - overview:

Some fishing takes place in adjacent waters. There is a potential source of income from harvesting finfish and krill. The islands receive income from postage stamps produced in the UK, sale of fishing licenses, and harbor and landing fees from tourist vessels. Tourism from specialized cruise ships is increasing rapidly.

Southern Ocean

(map)

Introduction ::

Background:

A large body of recent oceanographic research has shown that the Antarctic Circumpolar Current (ACC), an ocean current that flows from west to east around Antarctica, plays a crucial role in global ocean circulation. The region where the cold waters of the ACC meet and mingle with the warmer waters of the north defines a distinct border - the Antarctic Convergence - which fluctuates with the seasons, but which encompasses a discrete body of water and a unique ecologic region. The Convergence concentrates nutrients, which promotes marine plant life, and which in turn allows for a greater abundance of animal life. In the spring of 2000, the International Hydrographic Organization decided to delimit the waters within the Convergence as a fifth world ocean - the Southern Ocean - by combining the southern portions of the Atlantic Ocean, Indian Ocean,

and Pacific Ocean. The Southern Ocean extends from the coast of Antarctica north to 60 degrees south latitude, which coincides with the Antarctic Treaty Limit and which approximates the extent of the Antarctic Convergence. As such, the Southern Ocean is now the fourth largest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, and Indian Ocean, but larger than the Arctic Ocean). It should be noted that inclusion of the Southern Ocean does not imply recognition of this feature as one of the world's primary oceans by the US Government.

Geography ::

Location:

body of water between 60 degrees south latitude and Antarctica

Geographic coordinates:

60 00 S, 90 00 E (nominally), but the Southern Ocean has the unique distinction of being a large circumpolar body of water totally encircling the continent of Antarctica; this ring of water lies between 60 degrees south latitude and the coast of Antarctica and encompasses 360 degrees of longitude

Map references:

Antarctic Region

Area:

total: 20.327 million sq km

note: includes Amundsen Sea, Bellingshausen Sea, part of the Drake Passage, Ross Sea, a small part of the Scotia Sea, Weddell Sea, and other tributary water bodies

Area - comparative:

slightly more than twice the size of the US

Coastline:

17,968 km

Climate:

Current Weather

sea temperatures vary from about 10 degrees Celsius to -2 degrees Celsius; cyclonic storms travel eastward around the continent and frequently are intense because of the temperature contrast between ice and open ocean; the ocean area from about latitude 40 south to the Antarctic Circle has the strongest average winds found anywhere on Earth; in winter the ocean freezes outward to 65 degrees south latitude in the Pacific sector and 55 degrees south latitude in the Atlantic sector, lowering surface temperatures well below 0 degrees Celsius; at some coastal points intense persistent drainage winds from the interior keep the shoreline ice-free throughout the winter

Terrain:

the Southern Ocean is deep, 4,000 to 5,000 m over most of its extent with only limited areas of shallow water; the Antarctic continental shelf is generally narrow and unusually deep, its edge lying at depths of 400 to 800 m (the global mean is 133 m); the Antarctic icepack grows from an average minimum of 2.6 million sq km in March to about 18.8 million sq km in September, better than a sixfold increase in area; the Antarctic Circumpolar Current (21,000 km in length) moves perpetually eastward; it is the world's largest ocean current, transporting 130 million cubic meters of water per second - 100 times the flow of all the world's rivers

Elevation extremes:

lowest point: -7,235 m at the southern end of the South Sandwich Trench

highest point: sea level 0 m

Natural resources:

probable large and possible giant oil and gas fields on the continental margin; manganese nodules, possible placer deposits, sand and gravel, fresh water as icebergs; squid, whales, and seals - none exploited; krill, fish

Natural hazards:

huge icebergs with drafts up to several hundred meters; smaller bergs and iceberg fragments; sea ice (generally 0.5 to 1 m thick) with sometimes dynamic short-term variations and with large annual and interannual variations; deep continental shelf floored by glacial

deposits varying widely over short distances; high winds and large waves much of the year; ship icing, especially May-October; most of region is remote from sources of search and rescue

Environment - current issues:

increased solar ultraviolet radiation resulting from the Antarctic ozone hole in recent years, reducing marine primary productivity (phytoplankton) by as much as 15% and damaging the DNA of some fish; illegal, unreported, and unregulated fishing in recent years, especially the landing of an estimated five to six times more Patagonian toothfish than the regulated fishery, which is likely to affect the sustainability of the stock; large amount of incidental mortality of seabirds resulting from long-line fishing for toothfish

note: the now-protected fur seal population is making a strong comeback after severe overexploitation in the 18th and 19th centuries

Environment - international agreements:

the Southern Ocean is subject to all international agreements regarding the world's oceans; in addition, it is subject to these agreements specific to the Antarctic region: International Whaling Commission (prohibits commercial whaling south of 40 degrees south [south of 60 degrees south between 50 degrees and 130 degrees west]); Convention on the Conservation of Antarctic Seals (limits sealing); Convention on the Conservation of Antarctic Marine Living Resources (regulates fishing)

note: many nations (including the US) prohibit mineral resource exploration and exploitation south of the fluctuating Polar Front (Antarctic Convergence), which is in the middle of the Antarctic Circumpolar Current and serves as the dividing line between the cold polar surface waters to the south and the warmer waters to the north

Geography - note:

the major chokepoint is the Drake Passage between South America and Antarctica; the Polar Front (Antarctic Convergence) is the best natural definition of the northern extent of the Southern Ocean; it is a distinct region at the middle of the Antarctic Circumpolar Current that separates the cold polar surface waters to the south from the warmer waters to the north; the Front and the Current extend entirely around Antarctica, reaching south of 60 degrees south near New Zealand and near 48 degrees south in the far South Atlantic coinciding with the path of the maximum westerly winds

Economy ::

Economy - overview:

Fisheries in 2006-07 landed 126,976 metric tons, of which 82% (104,586 tons) was krill (*Euphausia superba*) and 9.5% (12,027 tons) Patagonian toothfish (*Dissostichus eleginoides* - also known as Chilean sea bass), compared to 127,910 tons in 2005-06 of which 83% (106,591 tons) was krill and 9.7% (12,396 tons) Patagonian toothfish (estimated fishing from the area covered by the Convention of the Conservation of Antarctic Marine Living Resources (CCAMLR), which extends slightly beyond the Southern Ocean area). International agreements were adopted in late 1999 to reduce illegal, unreported, and unregulated fishing, which in the 2000-01 season landed, by one estimate, 8,376 metric tons of Patagonian and Antarctic toothfish. In the 2007-08 Antarctic summer, 45,213 tourists visited the Southern Ocean, compared to 35,552 in 2006-2007, and 29,799 in 2005-2006 (estimates provided to the Antarctic Treaty by the International Association of Antarctica Tour Operators (IAATO), and does not include passengers on overflights and those flying directly in and out of Antarctica).

Transportation ::

Ports and terminals:

McMurdo, Palmer, and offshore anchorages in Antarctica

note: few ports or harbors exist on the southern side of the Southern Ocean; ice conditions limit use of most to short periods in midsummer; even then some cannot be entered without icebreaker escort; most Antarctic ports are operated by government research stations and, except in an emergency, are not open to commercial or private vessels

Transportation - note:

Drake Passage offers alternative to transit through the Panama Canal

Transnational Issues ::

Disputes - international:

Antarctic Treaty defers claims (see Antarctica entry), but Argentina,

Australia, Chile, France, NZ, Norway, and UK assert claims (some overlapping), including the continental shelf in the Southern Ocean; several states have expressed an interest in extending those continental shelf claims under the United Nations Convention on the Law of the Sea (UNCLOS) to include undersea ridges; the US and most other states do not recognize the land or maritime claims of other states and have made no claims themselves (the US and Russia have reserved the right to do so); no formal claims exist in the waters in the sector between 90 degrees west and 150 degrees west

Spain

>

Introduction ::

Background:

Spain's powerful world empire of the 16th and 17th centuries ultimately yielded command of the seas to England. Subsequent failure to embrace the mercantile and industrial revolutions caused the country to fall behind Britain, France, and Germany in economic and political power. Spain remained neutral in World Wars I and II but suffered through a devastating civil war (1936-39). A peaceful transition to democracy following the death of dictator Francisco

FRANCO in 1975, and rapid economic modernization (Spain joined the EU in 1986) gave Spain a dynamic and rapidly growing economy and made it a global champion of freedom and human rights. The government continues to battle the Basque Fatherland and Liberty (ETA) terrorist organization, but its major focus for the immediate future will be on measures to reverse the severe economic recession that started in mid-2008.

Flag description:

three horizontal bands of red (top), yellow (double width), and red with the national coat of arms on the hoist side of the yellow band; the coat of arms is quartered to display the emblems of the traditional

kingdoms of Spain (clockwise from upper left, Castile, Leon, Navarre, and Aragon) while Granada is represented by the stylized pomegranate at the bottom of the shield; the arms are framed by two columns representing the Pillars of Hercules, which are the two promontories (Gibraltar and Ceuta) on either side of the eastern end of the Strait of Gibraltar; the red scroll across the two columns bears the imperial motto of "Plus Ultra" (further beyond) referring to Spanish lands beyond Europe; the triband arrangement with the center stripe twice the width of the outer dates to the 18th century

note: the red and yellow colors are related to those of the oldest Spanish kingdoms: Aragon, Castile, Leon, and Navarre

National anthem:

name: "Himno Nacional Espanol" (National Anthem of Spain)

lyrics/music: none/unknown

note: officially in use between 1770 and 1931, restored in 1939; the Spanish anthem has no lyrics; in the years prior to 1931 it became known as "Marcha Real" (The Royal March); it first appeared in a 1761 military bugle call book and was replaced by "Himno de Riego" in the years between 1931 and 1939; the long version of the anthem is used for the king, while the short version is used for the prince, prime minister, and occasions such as sporting events

Economy ::

Economy - overview:

Spain's mixed capitalist economy is the 12th largest in the world, and its per capita income roughly matches that of Germany and France. However, after almost 15 years of above average GDP growth, the Spanish economy began to slow in late 2007 and entered into a recession in the second quarter of 2008. GDP contracted by 3.7% in 2009, ending a 16-year growth trend, and by another 0.4% in 2010, making Spain the last major economy to emerge from the global recession. The reversal in Spain's economic growth reflects a significant decline in the construction sector, an oversupply of housing, falling consumer spending, and slumping exports. Government efforts to boost the economy through stimulus spending, extended unemployment benefits, and loan guarantees did not prevent a sharp rise in the unemployment rate, which rose from a low of about 8% in 2007 to 20% in 2010. The government budget deficit worsened

from 3.8% of GDP in 2008 to about 9.7% of GDP in 2010, more than three times the euro-zone limit. Spain's large budget deficit and poor economic growth prospects have made it vulnerable to financial contagion from other highly-indebted euro zone members despite the government's efforts to cut spending, privatize industries, and boost competitiveness through labor market reforms. Spanish banks' high exposure to the collapsed domestic construction and real estate market also poses a continued risk for the sector. The government intervened in one regional savings bank in 2009, and investors remain concerned that Madrid may need to bail out more troubled banks. The Bank of Spain, however, is seeking to boost confidence in the financial sector by pressuring banks to come clean about their losses and consolidate into stronger groups.

Transnational Issues ::

Disputes - international:

in 2002, Gibraltar residents voted overwhelmingly by referendum to reject any "shared sovereignty" arrangement; the government of Gibraltar insists on equal participation in talks between the UK and Spain; Spain disapproves of UK plans to grant Gibraltar greater autonomy; Morocco protests Spain's control over the coastal enclaves of Ceuta, Melilla, and the islands of Penon de Velez de la Gomera, Penon de Alhucemas, and Islas Chafarinas, and surrounding waters; both countries claim Isla Perejil (Leila Island); Morocco serves as the primary launching site of illegal migration into Spain from North Africa; Portugal does not recognize Spanish sovereignty over the territory of Olivenza based on a difference of interpretation of the 1815 Congress of Vienna and the 1801 Treaty of Badajoz

Spratly Islands

Introduction ::

Background:

The Spratly Islands consist of more than 100 small islands or reefs. They are surrounded by rich fishing grounds and potentially by gas and oil deposits. They are claimed in their entirety by China, Taiwan, and Vietnam, while portions are claimed by Malaysia and the Philippines. About 45 islands are occupied by relatively small numbers of military forces from China, Malaysia, the Philippines, Taiwan, and Vietnam. Brunei has established a fishing zone that overlaps a southern reef but has not made any formal claim.

all of the Spratly Islands are claimed by China (including Taiwan) and Vietnam; parts of them are claimed by Brunei, Malaysia and the Philippines; despite no public territorial claim to Louisa Reef, Brunei implicitly lays claim by including it within the natural prolongation of its continental shelf and basis for a seabed median with Vietnam; claimants in November 2002 signed the "Declaration on the Conduct of Parties in the South China Sea," which has eased tensions but falls short of a legally binding "code of conduct"; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands

Sri Lanka

>

Introduction ::

Background:

The first Sinhalese arrived in Sri Lanka late in the 6th century B.C. probably from northern India. Buddhism was introduced in about the mid-third century B.C., and a great civilization developed at the cities of Anuradhapura (kingdom from circa 200 B.C. to circa A.D. 1000) and Polonnaruwa (from about 1070 to 1200). In the 14th century, a south Indian dynasty established a Tamil kingdom in northern Sri Lanka. The coastal areas of the island were controlled by the

Portuguese in the 16th century and by the Dutch in the 17th century. The island was ceded to the British in 1796, became a crown colony in 1802, and was united under British rule by 1815. As Ceylon, it became independent in 1948; its name was changed to Sri Lanka in 1972. Tensions between the Sinhalese majority and Tamil separatists erupted into war in 1983. After two decades of fighting, the government and Liberation Tigers of Tamil Eelam (LTTE) formalized a cease-fire in February 2002 with Norway brokering peace negotiations. Violence between the LTTE and government forces intensified in 2006 and the government regained control of the Eastern Province in 2007. In May 2009, the government announced that its military had finally defeated the remnants of the LTTE and that its leader, Velupillai PRABHAKARAN, had been killed.

Economy ::

Economy - overview:

Sri Lanka is engaging in large-scale reconstruction and development projects following the end of the 26-year conflict with the LTTE, including increasing electricity access and rebuilding its road and rail network. Additionally, Sri Lanka seeks to reduce poverty by using a combination of state directed policies and private investment promotion to spur growth in disadvantaged areas, develop small and medium enterprises, and promote increased agriculture. High levels of government funding may be difficult, as the government already is faced with high debt interest payments, a bloated civil service, and historically high budget deficits. The 2008-09 global financial crisis and recession exposed Sri Lanka's economic vulnerabilities and nearly caused a balance of payments crisis, which was alleviated by a \$2.6 billion IMF standby agreement in July 2009. The end of the civil war and the IMF loan, however, have largely restored investors' confidence, reflected in part by the Sri Lankan stock market's recognition as one of the best performing markets in the world. Sri Lankan growth rates averaged nearly 5% in during the war, but increased government spending on development and fighting the LTTE in the final years spurred GDP growth to around 6-7% per year in 2006-08. After experiencing 3.5% growth in 2009, Sri Lanka's economy is poised to achieve high growth rates in the postwar period.

Trafficking in persons:

current situation: Sri Lanka is a source and destination country for men and women trafficked for the purposes of involuntary servitude and commercial sexual exploitation; Sri Lankan men and women migrate willingly to the Persian Gulf, Middle East, and East Asia to work as construction workers, domestic servants, or garment factory workers, where some find themselves in situations of involuntary servitude when faced with restrictions on movement, withholding of passports, threats, physical or sexual abuse, and debt bondage; children are trafficked internally for commercial sexual exploitation and, less frequently, for forced labor

tier rating: Tier 2 Watch List - for a fourth consecutive year, Sri Lanka

is on the Tier 2 Watch List for failing to provide evidence of increasing efforts to combat severe forms of human trafficking, particularly in the area of law enforcement; the government failed to arrest, prosecute, or convict any person for trafficking offenses and continued to punish some victims of trafficking for crimes committed as a result of being trafficked; Sri Lanka has not ratified the 2000 UN TIP Protocol (2008)

Sudan

Introduction ::

Background:

Military regimes favoring Islamic-oriented governments have dominated national politics since independence from the UK in 1956. Sudan was embroiled in two prolonged civil wars during most of the remainder of the 20th century. These conflicts were rooted in northern economic, political, and social domination of largely non-Muslim, non-Arab southern Sudanese. The first civil war ended in 1972 but broke out again in 1983. The second war and famine-related effects

resulted in more than four million people displaced and, according to rebel estimates, more than two million deaths over a period of two decades. Peace talks gained momentum in 2002-04 with the signing of several accords. The final North/South Comprehensive Peace Agreement (CPA), signed in January 2005, granted the southern rebels autonomy for six years followed by a referendum on independence for Southern Sudan. The referendum was held in January 2011 and indicated overwhelming support for independence. A separate conflict, which broke out in the western region of Darfur in 2003, has displaced nearly two million people and caused an estimated 200,000 to 400,000 deaths. The UN took command of the Darfur peacekeeping operation from the African Union on 31 December 2007. As of early 2009, peacekeeping troops were struggling to stabilize the situation, which has become increasingly regional in scope and has brought instability to eastern Chad. Sudan also has faced large refugee influxes from neighboring countries primarily Ethiopia and Chad. Armed conflict, poor transport infrastructure, and lack of government support have chronically obstructed the provision of humanitarian assistance to affected populations.

Economy ::

Economy - overview:

Since 1997, Sudan has been working with the IMF to implement macroeconomic reforms including a managed float of the exchange rate and a large reserve of foreign exchange. A new currency, the Sudanese Pound, was introduced in January 2007 at an initial exchange rate of \$1.00 equals 2 Sudanese Pounds. Sudan began exporting crude oil in the last quarter of 1999 and the economy boomed on the back of increases in oil production, high oil prices, and significant inflows of foreign direct investment until the second half of 2008. The Darfur conflict, the aftermath of two decades of civil war in the south, the lack of basic infrastructure in large areas, and a reliance by much of the population on subsistence agriculture ensure much of

the population will remain at or below the poverty line for years to come despite rapid rises in average per capita income. Sudan's real GDP expanded by 5.2% during 2010, an improvement over 2009's 4.2% growth but significantly below the more than 10% per year growth experienced prior to the global financial crisis in 2006 and 2007. While the oil sector continues to drive growth, services and utilities play an increasingly important role in the economy with agriculture production remaining important as it employs 80% of the work force and contributes a third of GDP. In the lead up to the referendum on southern secession, scheduled in January 2011, Sudan saw its currency depreciate considerably on the black market with the Central Bank's official rate also losing value as the Sudanese people started to hoard foreign currency. The Central Bank of Sudan intervened heavily in the currency market to defend the value of the pound and the Sudanese government introduced a number of measures to restrain excess local demand for hard currency, but uncertainty ahead of the referendum has meant that foreign exchange remained in heavy demand as 2010 came to a close.

Transnational Issues ::

Disputes - international:

the effects of Sudan's almost constant ethnic and rebel militia fighting since the mid-20th century have penetrated all of the neighboring states; as of 2006, Chad, Ethiopia, Kenya, Central African Republic, Democratic Republic of the Congo, and Uganda provided shelter for over half a million Sudanese refugees, which includes 240,000 Darfur residents driven from their homes by Janjawid armed militia and the Sudanese military forces; Sudan, in turn, hosted about 116,000 Eritreans, 20,000 Chadians, and smaller numbers of Ethiopians, Ugandans, Central Africans, and Congolese as refugees; in February 2006, Sudan and DROC signed an agreement to repatriate 13,300 Sudanese and 6,800 Congolese; Sudan accuses Eritrea of supporting Sudanese rebel groups; efforts to demarcate the porous boundary with Ethiopia proceed slowly due to civil and ethnic fighting in eastern Sudan; the boundary that separates Kenya and Sudan's sovereignty is unclear in the "Ilemi Triangle," which Kenya has administered since colonial times; Sudan claims but Egypt de facto administers security and economic development of Halaib region north of the 22nd parallel boundary; periodic violent skirmishes with Sudanese residents over water and grazing rights persist among related pastoral populations along the border with the Central African Republic

Refugees and internally displaced persons:

refugees (country of origin): 157,220 (Eritrea); 25,023 (Chad); 11,009 (Ethiopia); 7,895 (Uganda); 5,023 (Central African Republic)

IDPs: 5.3 - 6.2 million (civil war 1983-2005; ongoing conflict in Darfur region) (2007)

Trafficking in persons:

current situation: Sudan is a source country for men, women, and children trafficked internally for the purposes of forced labor and sexual exploitation; Sudan is also a transit and destination country for Ethiopian women trafficked abroad for domestic servitude; Sudanese women and girls are trafficked within the country as well as possibly to Middle Eastern countries for domestic servitude; the terrorist rebel organization, Lord's Resistance Army, continues to harbor small numbers of Sudanese and Ugandan children in the southern part of the country for use as cooks, porters, and combatants; some of these children are also trafficked across borders into Uganda or the Democratic Republic of the Congo; militia groups in Darfur, some of which are linked to the government, abduct women for short periods

of forced labor and to perpetrate sexual violence; during the two decades-long north-south civil war, thousands of Dinka women and children were abducted and subsequently enslaved by members of the Missiriya and Rezeigat tribes; while there have been no known new abductions of Dinka by members of Baggara tribes in the last few years, inter-tribal abductions continue in southern Sudan

tier rating: Tier 3 - Sudan does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; combating human trafficking through law enforcement or prevention measures was not a priority for the government in 2007 (2008)

Introduction ::

Background:

First explored by the Spaniards in the 16th century and then settled by the English in the mid-17th century, Suriname became a Dutch colony in 1667. With the abolition of slavery in 1863, workers were brought in from India and Java. Independence from the Netherlands was granted in 1975. Five years later the civilian government was replaced by a military regime that soon declared a socialist republic. It continued to exert control through a succession of nominally civilian

administrations until 1987, when international pressure finally forced a democratic election. In 1990, the military overthrew the civilian leadership, but a democratically elected government - a four-party coalition - returned to power in 1991. The coalition expanded to eight parties in 2005 and has continued to rule since.

Economy ::

Economy - overview:

The economy is dominated by the mining industry, with exports of alumina, gold, and oil accounting for about 85% of exports and 25% of government revenues, making the economy highly vulnerable to mineral price volatility. In 2000, the government of Ronald VENETIAAN, returned to office and inherited an economy with inflation of over 100% and a growing fiscal deficit. He quickly implemented an austerity program, raised taxes, attempted to control spending, and tamed inflation. Economic growth reached about 6% in 2007 and 2008, owing to sizeable foreign investment in mining and oil. Suriname has received aid for projects in the bauxite and gold mining sectors from Netherlands, Belgium, and the European Development Fund. The economy contracted in 2009, however, as investment waned and the country earned less from its commodity exports when global prices for most commodities fell. Trade picked up, boosting Suriname's economic growth in 2010, but the government's budget remained strained, with increased social spending during last year's election. Suriname's economic prospects for the medium term will depend on continued commitment to responsible monetary and fiscal policies and to the introduction of structural reforms to liberalize markets and promote competition.

Economy ::

Economy - overview:

Coal mining, tourism, and international research are the major revenue sources on Svalbard. Coal mining is the dominant economic activity and a treaty of 9 February 1920 gave the 41 signatories equal rights to exploit mineral deposits, subject to Norwegian regulation. Although US, UK, Dutch, and Swedish coal companies have mined in the past, the only companies still engaging in this are Norwegian and Russian. The settlements on Svalbard are essentially company towns. The Norwegian state-owned coal company employs nearly 60% of the Norwegian population on the island, runs many of the local services, and provides most of the local infrastructure. There is also some hunting of seal, reindeer, and fox.

Swaziland

Introduction ::

Background:

Autonomy for the Swazis of southern Africa was guaranteed by the British in the late 19th century; independence was granted in 1968. Student and labor unrest during the 1990s pressured King MSWATI III, the world's last absolute monarch, to grudgingly allow political reform and greater democracy, although he has backslid on these promises in recent years. A constitution came into effect in 2006, but political parties remain banned. The African United Democratic Party

tried unsuccessfully to register as an official political party in mid 2006. Talks over the constitution broke down between the government and progressive groups in 2007. Swaziland recently surpassed Botswana as the country with the world's highest known HIV/AIDS prevalence rate.

Economy ::

Economy - overview:

In this small, landlocked economy, subsistence agriculture occupies approximately 70% of the population. The manufacturing sector has diversified since the mid-1980s. Sugar and wood pulp remain important foreign exchange earners. In 2007, the sugar industry increased efficiency and diversification efforts, in response to a 17% decline in EU sugar prices. Mining has declined in importance in recent years with only coal and quarry stone mines remaining active. Surrounded by South Africa, except for a short border with Mozambique, Swaziland is heavily dependent on South Africa from which it receives more than nine-tenths of its imports and to which it sends 60% of its exports. Swaziland's currency is pegged to the South African rand, subsuming Swaziland's monetary policy to South Africa. Customs duties from the Southern African Customs Union (SACU) account for two-thirds of Swaziland's government revenues, and worker remittances from South Africa substantially supplement domestically earned income. Customs revenues plummeted during the global economic crisis and Swaziland has appealed to SACU for assistance. With an estimated 40% unemployment rate, Swaziland's need to increase the number and size of small and medium enterprises and attract foreign direct investment is acute. Overgrazing, soil depletion, drought, and sometimes floods persist as problems for the future. More than one-fourth of the population needed emergency food aid in 2006-07 because of drought, and more than one-quarter of the adult population has been infected by HIV/AIDS.

Transnational Issues ::

Disputes - international:

in 2006, Swazi king advocates resort to ICJ to claim parts of Mpumalanga and KwaZulu-Natal from South Africa

Trafficking in persons:

current situation: Swaziland is a source, destination, and transit country for women and children trafficked internally and transnationally for the purposes of commercial sexual exploitation, domestic servitude, and forced labor in agriculture; Swazi girls, particularly orphans, are trafficked internally for commercial sexual exploitation and domestic servitude, as well as to South Africa and Mozambique; Swazi boys are trafficked for forced labor in commercial agriculture and market vending; some Swazi women are forced into prostitution in South Africa and Mozambique after voluntarily migrating to these countries in search of work

tier rating: Tier 2 Watch List - the government of Swaziland does not comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government believes that trafficking probably does occur, but does not know the extent of the problem; the government does not judge trafficking to be an "important" problem and chooses to direct its limited resources towards other issues, a judgment which significantly limited the government's current efforts to eliminate human trafficking, or to plan anti-trafficking activities or initiatives for the future (2010)

Introduction ::

Background:

A military power during the 17th century, Sweden has not participated in any war for almost two centuries. An armed neutrality was preserved in both World Wars. Sweden's long-successful economic formula of a capitalist system interlarded with substantial welfare elements was challenged in the 1990s by high unemployment and in 2000-02 and 2009 by the global economic downturns, but fiscal discipline over the past several years has allowed the country to weather economic vagaries. Sweden joined the EU in 1995, but the public rejected the introduction of the euro in a 2003 referendum.

Economy ::

Economy - overview:

Aided by peace and neutrality for the whole of the 20th century, Sweden has achieved an enviable standard of living under a mixed system of high-tech capitalism and extensive welfare benefits. It has a modern distribution system, excellent internal and external communications, and a skilled labor force. In September 2003, Swedish voters turned down entry into the euro system concerned about the impact on the economy and sovereignty. Timber, hydropower, and iron ore constitute the resource base of an economy heavily oriented toward foreign trade. Privately owned firms account for about 90% of industrial output, of which the engineering sector accounts for 50% of output and exports. Agriculture accounts for little more than 1% of GDP and of employment. Until 2008, Sweden was in

the midst of a sustained economic upswing, boosted by increased domestic demand and strong exports. This and robust finances offered the center-right government considerable scope to implement its reform program aimed at increasing employment, reducing welfare dependence, and streamlining the state's role in the economy. Despite strong finances and underlying fundamentals, the Swedish economy slid into recession in the third quarter of 2008 and growth continued downward in 2009 as deteriorating global conditions reduced export demand and consumption. Strong exports of commodities and a return to profitability by Sweden's banking sector drove the strong rebound in 2010.

Introduction ::

Background:

The Swiss Confederation was founded in 1291 as a defensive alliance among three cantons. In succeeding years, other localities joined the original three. The Swiss Confederation secured its independence from the Holy Roman Empire in 1499. A constitution of 1848, subsequently modified in 1874, replaced the confederation with a centralized federal government. Switzerland's sovereignty and neutrality have long been honored by the major European powers, and the country was not involved in either of the two World Wars. The political and economic integration of Europe over the past half century, as well as Switzerland's role in many UN and international organizations, has strengthened Switzerland's ties with its neighbors. However, the country did not officially become a UN member until 2002. Switzerland remains active in many UN and international

organizations but retains a strong commitment to neutrality.

Economy ::

Economy - overview:

Switzerland is a peaceful, prosperous, and modern market economy with low unemployment, a highly skilled labor force, and a per capita GDP among the highest in the world. Switzerland's economy benefits from a highly developed service sector, led by financial services, and a manufacturing industry that specializes in high-technology, knowledge-based production. The Swiss have brought their economic practices largely into conformity with the EU's, in order to enhance their international competitiveness, but some trade protectionism remains, particularly for its small agricultural sector. The global financial crisis and resulting economic downturn put Switzerland in a recession in 2009 as global export demand stalled. The Swiss National Bank during this period effectively implemented a zero-interest rate policy in a bid to boost the economy and prevent appreciation of the franc. Switzerland's economy grew 2.8% in 2010, when Bern implemented a third fiscal stimulus program, but its prized banking sector has recently faced significant challenges. The country's largest banks suffered sizable losses in 2008-09, leading its largest bank to accept a government rescue deal in late 2008. Switzerland has also come under increasing pressure from individual neighboring countries, the EU, the US, and international institutions to reform its

banking secrecy laws. Consequently, the government agreed to conform to OECD regulations on administrative assistance in tax matters, including tax evasion. The government has renegotiated its double taxation agreements with numerous countries, including the US, to incorporate the OECD standard, and it is working with Germany and the UK to resolve outstanding issues, particularly the possibility of imposing taxes on bank deposits held by foreigners. Parliament passed the first five double-taxation agreements, including that with the US, in March 2010, but the agreements are subject to public referendum. In 2009, Swiss financial regulators ordered the country's largest bank to reveal at Washington's behest the names of US account-holders suspected of using the bank to commit tax fraud. These steps will have a lasting impact on Switzerland's long history of bank secrecy.

Introduction ::

Background:

Following World War I, France acquired a mandate over the northern portion of the former Ottoman Empire province of Syria. The French administered the area as Syria until granting it independence in 1946. The new country lacked political stability, however, and experienced a series of military coups during its first decades. Syria united with Egypt in February 1958 to form the United Arab Republic. In September 1961, the two entities separated, and the Syrian Arab

Republic was reestablished. In November 1970, Hafiz al-ASAD, a member of the Socialist Ba'th Party and the minority Alawite sect, seized power in a bloodless coup and brought political stability to the country. In the 1967 Arab-Israeli War, Syria lost the Golan Heights to Israel. During the 1990s, Syria and Israel held occasional peace talks over its return. Following the death of President al-ASAD, his son, Bashar al-ASAD, was approved as president by popular referendum in July 2000. Syrian troops - stationed in Lebanon since 1976 in an ostensible peacekeeping role - were withdrawn in April 2005. During the July-August 2006 conflict between Israel and Hizballah, Syria placed its military forces on alert but did not intervene directly on behalf of its ally Hizballah. In May 2007 Bashar al-ASAD was elected to his second term as president.

Flag description:

three equal horizontal bands of red (top), white, and black; two small, green, five-pointed stars in a horizontal line centered in the white band; the band colors derive from the Arab Liberation flag and represent oppression (black), overcome through bloody struggle (red), to be replaced by a bright future (white); identical to the former flag of the United Arab Republic (1958-1961) where the two stars represented the constituent states of Syria and Egypt; the current design dates to 1980

note: similar to the flag of Yemen, which has a plain white band, Iraq, which has an Arabic inscription centered in the white band, and that

of Egypt, which has a gold Eagle of Saladin centered in the white band

National anthem:

name: "Humat ad-Diyar" (Guardians of the Homeland)

lyrics/music: Khalil Mardam BEY/Mohammad Salim FLAYFEL and Ahmad Salim FLAYFEL

note: adopted 1936, restored 1961; between 1958 and 1961, while Syria was a member of the United Arab Republic with Egypt, the country had a different anthem

Economy ::

Economy - overview:

Syrian economic growth slowed to 1.8% in 2009 as the global economic crisis affected oil prices and the economies of Syria's key export partners and sources of investment. Damascus has implemented modest economic reforms in the past few years, including cutting lending interest rates, opening private banks, consolidating all of the multiple exchange rates, raising prices on some subsidized items, most notably gasoline and cement, and establishing the Damascus Stock Exchange - which began operations in 2009. In addition, President ASAD signed legislative decrees to encourage corporate ownership reform, and to allow the Central Bank to issue Treasury bills and bonds for government debt. Nevertheless, the economy remains highly controlled by the government. Long-run economic constraints include declining oil production, high unemployment, rising budget deficits, and increasing pressure on water supplies caused by heavy use in agriculture, rapid population growth, industrial expansion, and water pollution.

Transnational Issues ::

Disputes - international:

Golan Heights is Israeli-occupied with the almost 1,000-strong UN Disengagement Observer Force (UNDOF) patrolling a buffer zone since 1964; lacking a treaty or other documentation describing the boundary, portions of the Lebanon-Syria boundary are unclear with several sections in dispute; since 2000, Lebanon has claimed Shab'a Farms in the Golan Heights; 2004 Agreement and pending demarcation settles border dispute with Jordan; approximately two million Iraqis have fled the conflict in Iraq with the majority taking refuge in Syria and Jordan

Refugees and internally displaced persons:

refugees (country of origin): 1-1.4 million (Iraq); 522,100 (Palestinian Refugees (UNRWA))

IDPs: 305,000 (most displaced from Golan Heights during 1967 Arab-Israeli War) (2007)

Trafficking in persons:

current situation: Syria is a destination and transit country for women and children trafficked for commercial sexual exploitation and forced labor; a significant number of women and children in the large and expanding Iraqi refugee community in Syria are reportedly forced into commercial sexual exploitation by Iraqi gangs or, in some cases, their families; women from Indonesia, Sri Lanka, the Philippines, Ethiopia, and Sierra Leone are recruited for work in Syria as domestic servants, but some face conditions of involuntary servitude, including long hours, non-payment of wages, withholding of passports, restrictions on movement, threats, and physical or sexual abuse

tier rating: Tier 2 Watch List - Syria again failed to report any law enforcement efforts to punish trafficking offenses in 2007; in addition, the government did not offer protection services to victims of trafficking and may have arrested, prosecuted, or deported some victims for prostitution or immigration violations; Syria has not ratified the 2000 UN TIP Protocol (2008)

Illicit drugs:

a transit point for opiates, hashish, and cocaine bound for regional and Western markets; weak anti-money-laundering controls and bank privatization may leave it vulnerable to money laundering

Introduction ::

Background:

The Tajik people came under Russian rule in the 1860s and 1870s, but Russia's hold on Central Asia weakened following the Revolution of 1917. Bolshevik control of the area was fiercely contested and not fully reestablished until 1925. Much of present-day Sughd province was transferred from the Uzbek SSR to the newly formed Tajik SSR in 1929. Ethnic Uzbeks form a substantial minority in Sughd province. Tajikistan became independent in 1991 following the breakup of the Soviet Union, and experienced a civil war between regional factions from 1992-97. There have been no major security incidents in recent years, although the country remains the poorest in the former Soviet sphere. Attention by the international community since the beginning of the NATO intervention in Afghanistan has brought increased economic development and security assistance, which could create

jobs and strengthen stability in the long term. Tajikistan is in the early stages of seeking World Trade Organization membership and has joined NATO's Partnership for Peace.

Flag description:

three horizontal stripes of red (top), a wider stripe of white, and green; a gold crown surmounted by seven gold, five-pointed stars is located in the center of the white stripe; red represents the sun, victory, and the unity of the nation, white stands for purity, cotton, and mountain snows, while green is the color of Islam and the bounty of nature; the crown symbolizes the Tajik people; the seven stars signify the Tajik magic word "seven" - a symbol of perfection and the embodiment of happiness

National anthem:

name: "Surudi milli" (National Anthem)

lyrics/music: Gulnazar KELDI/Suleiman YUDAKOV

note: adopted 1991; after the fall of the Soviet Union, Tajikistan kept the music of the anthem from its time as a Soviet republic but adopted new lyrics

Economy ::

Economy - overview:

Tajikistan has one of the lowest per capita GDPs among the 15 former Soviet republics. Because of a lack of employment opportunities in Tajikistan, nearly half of the labor force works abroad, primarily in Russia and Kazakhstan, supporting families in Tajikistan through remittances. The exact number of labor migrants is unknown, but estimated at around 1 million. Less than 7% of the land area is arable. Cotton is the most important crop, but this sector is burdened with debt and obsolete infrastructure; moreover, government has encouraged a gradual transition away from cotton and towards food cultivation due to its concerns about feeding the population. Mineral resources include silver, gold, uranium, and tungsten. Industry consists only of a large aluminum plant, hydropower facilities, and small obsolete factories mostly in light industry and food processing. The civil war (1992-97) severely damaged the already weak economic

infrastructure and caused a sharp decline in industrial and agricultural production. Tajikistan's economic situation remains fragile due to uneven implementation of structural reforms, corruption, weak governance, seasonal power shortages, and the external debt burden. A debt restructuring agreement was reached with Russia in December 2002, including a \$250 million write-off of Tajikistan's \$300 million debt. Completion of the Sangtuda I hydropower dam - finished in 2009 with Russian investment - and the Sangtuda II and Rogun dams will add substantially to electricity output. If finished according to Tajik plans, Rogun will be the world's tallest dam. The World Bank, in 2010, agreed to fund safety and feasibility studies for the Rogun Dam. Favorable reports from these studies could increase investor interest in the project, which has been stalled due to lack of funding. Tajikistan has also received substantial infrastructure development loans from the Chinese government to improve roads and an electricity transmission network. To help increase north-south trade, the US funded a \$36 million bridge which opened in August 2007 and links Tajikistan and Afghanistan. While Tajikistan has experienced steady economic growth since 1997, more than half of the population continues to live in poverty. Economic growth reached 10.6% in 2004, but dropped below 8% in 2005-08, as the effects of higher oil prices and then the international financial crisis began to register - mainly in the form of lower prices for key export commodities and lower remittances from Tajiks working abroad, due to the global economic downturn. In 2009 GDP growth dropped to 3.4% as a result of the world recession.

Transnational Issues ::

Disputes - international:

in 2006, China and Tajikistan pledged to commence demarcation of the revised boundary agreed to in the delimitation of 2002; talks continue with Uzbekistan to delimit border and remove minefields; disputes in Isfara Valley delay delimitation with Kyrgyzstan

Trafficking in persons:

current situation: Tajikistan is a source country for women trafficked through Kyrgyzstan and Russia to the UAE, Turkey, and Russia for the purpose of commercial sexual exploitation; men are trafficked to Russia and Kazakhstan for the purpose of forced labor, primarily in the construction and agricultural industries; boys and girls are trafficked internally for various purposes, including forced labor and forced begging

tier rating: Tier 2 Watch List - Tajikistan is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat human trafficking, especially efforts to investigate, prosecute, convict, and sentence traffickers; despite evidence of low- and mid-level officials' complicity in trafficking, the government did not punish any public officials for trafficking complicity during 2007; lack of capacity and poor coordination between government institutions remained key obstacles to effective anti-trafficking efforts (2008)

Illicit drugs:

major transit country for Afghan narcotics bound for Russian and, to a lesser extent, Western European markets; limited illicit cultivation of opium poppy for domestic consumption; Tajikistan seizes roughly 80% of all drugs captured in Central Asia and stands third worldwide in seizures of opiates (heroin and raw opium); significant consumer of opiates

Tanzania

Introduction ::

Background:

Shortly after achieving independence from Britain in the early 1960s, Tanganyika and Zanzibar merged to form the nation of Tanzania in 1964. One-party rule came to an end in 1995 with the first democratic elections held in the country since the 1970s. Zanzibar's semi-autonomous status and popular opposition have led to two contentious elections since 1995, which the ruling party won despite international observers' claims of voting irregularities.

Flag description:

divided diagonally by a yellow-edged black band from the lower hoist-side corner; the upper triangle (hoist side) is green and the lower triangle is blue; the banner combines colors found on the flags of Tanganyika and Zanzibar; green represents the natural vegetation of the country, gold its rich mineral deposits, black the native Swahili people, and blue the country's many lakes and rivers, as well as the Indian Ocean

National anthem:

name: "Mungu ibariki Afrika" (God Bless Africa)

lyrics/music: collective/Enoch Mankayi SONTONGA

note: adopted 1961; the anthem, which is also a popular song in Africa, shares the same melody with that of Zambia, but has different lyrics; the melody is also incorporated into South Africa's anthem

Economy ::

Economy - overview:

Tanzania is one of the world's poorest economies in terms of per capita income, however, Tanzania average 7% GDP growth per year between 2000 and 2008 on strong gold production and tourism. The economy depends heavily on agriculture, which accounts for more than one-fourth of GDP, provides 85% of exports, and employs about 60% of the work force. The World Bank, the IMF, and bilateral donors have provided funds to rehabilitate Tanzania's aging economic infrastructure, including rail and port infrastructure that are important trade links for inland countries. Recent banking reforms have helped increase private-sector growth and investment, and the government has increased spending on agriculture to 7% of its budget. Continued donor assistance and solid macroeconomic policies supported a positive growth rate, despite the world recession. In 2008, Tanzania received the world's largest Millennium Challenge Compact grant, worth \$698 million. Dar es Salaam used fiscal stimulus and loosened monetary policy to ease the impact of the global recession. GDP growth in 2009-10 was a respectable 6% per year due to high gold prices and increased production.

Introduction ::

Background:

A unified Thai kingdom was established in the mid-14th century. Known as Siam until 1939, Thailand is the only Southeast Asian country never to have been taken over by a European power. A bloodless revolution in 1932 led to a constitutional monarchy. In alliance with Japan during World War II, Thailand became a US treaty ally following the conflict. A military coup in September 2006 ousted then Prime Minister THAKSIN Chinnawat. The interim government held elections in December 2007 that saw the former pro-THAKSIN People's Power Party (PPP) emerge at the head of a coalition government. The anti-THAKSIN People's Alliance for Democracy (PAD) in May 2008 began street demonstrations against the new government, eventually occupying the prime minister's office in August and Bangkok's two international airports in November. The PAD ended their protests in early December 2008 following a court ruling that dissolved the ruling PPP and two other coalition parties for election violations. The Democrat Party then formed a new coalition government and ABHISIT Wetchachiwa became prime minister. In October 2008 THAKSIN went into voluntary exile to avoid imprisonment for a corruption conviction, and has since agitated his followers from abroad. THAKSIN supporters re-organized into the United Front for Democracy Against Dictatorship (UDD) and rioted in April 2009, shutting down an ASEAN meeting in Phuket, and in early 2010 protested a court verdict confiscating most of THAKSIN's wealth. Between March and May 2010, the UDD staged large protests and occupied several blocks of downtown Bangkok. A government operation to disperse the protesters after nine weeks led to clashes that resulted in 89 deaths and an estimated \$1.5 billion in arson-related property losses. These protests exposed major cleavages in the Thai body politic which continue to hamper the current government. Since January 2004, thousands have been killed as separatists in Thailand's southern ethnic Malay-Muslim provinces increased the violence associated with their cause.

Economy ::

Economy - overview:

With a well-developed infrastructure, a free-enterprise economy, generally pro-investment policies, and strong export industries, Thailand enjoyed solid growth from 2000 to 2008 - averaging more than 4% per year - as it recovered from the Asian financial crisis of 1997-98. Thai exports - mostly machinery and electronic components, agricultural commodities, and jewelry - continue to drive the economy, accounting for more than half of GDP. The global financial crisis of 2008-09 severely cut Thailand's exports, with most sectors experiencing double-digit drops. In 2009, the economy contracted 2.2%. In 2010, Thailand's economy expanded 7.6%, its fastest pace since 1995, as exports rebounded from their depressed 2009 level. Antigovernment protests during March-May and the country's polarized political situation had - at most - a temporary impact on business and consumer confidence. Although tourism was hit hard during the protests, its quick recovery helped boost consumer confidence to new highs. Moreover, business and investor sentiment remained buoyant as Thailand's stock market grew almost 5% during the three-month period. The economy probably will continue to experience high growth well into 2011.

Introduction ::

Background:

The Portuguese began to trade with the island of Timor in the early 16th century and colonized it in mid-century. Skirmishing with the Dutch in the region eventually resulted in an 1859 treaty in which Portugal ceded the western portion of the island. Imperial Japan occupied Portuguese Timor from 1942 to 1945, but Portugal resumed colonial authority after the Japanese defeat in World War II. East Timor declared itself independent from Portugal on 28 November

1975 and was invaded and occupied by Indonesian forces nine days later. It was incorporated into Indonesia in July 1976 as the province of Timor Timur (East Timor). An unsuccessful campaign of pacification followed over the next two decades, during which an estimated 100,000 to 250,000 individuals lost their lives. On 30 August 1999, in a UN-supervised popular referendum, an overwhelming majority of the people of Timor-Leste voted for independence from Indonesia. Between the referendum and the arrival of a multinational peacekeeping force in late September 1999, anti-independence Timorese militias - organized and supported by the Indonesian military - commenced a large-scale, scorched-earth campaign of retribution. The militias killed approximately 1,400 Timorese and forcibly pushed 300,000 people into western Timor as refugees. The majority of the country's infrastructure, including homes, irrigation systems, water supply systems, and schools, and nearly 100% of the country's electrical grid were destroyed. On 20 September 1999, the Australian-led peacekeeping troops of the International Force for East Timor (INTERFET) deployed to the country and brought the violence to an end. On 20 May 2002, Timor-Leste was internationally recognized as an independent state. In late April 2006, internal tensions threatened the new nation's security when a military strike led to violence and a near breakdown of law and order. At Dili's request, an Australian-led International Stabilization Force (ISF) deployed to Timor-Leste in late May. In August, the UN Security Council established the UN Integrated Mission in Timor-Leste (UNMIT), which included an authorized police presence of over 1,600 personnel. The ISF and UNMIT restored stability, allowing for presidential and parliamentary elections in April and June 2007 in a largely peaceful atmosphere. In February 2008, a rebel group staged an unsuccessful attack against the president and prime minister. The ringleader was killed in the attack and the majority of the rebels surrendered in April 2008. Since the unsuccessful attacks the government has enjoyed one of its longest periods of post-independence stability.

lyrics/music: Francisco Borja DA COSTA/Afonso DE ARAUJO

note: adopted 2002; the song was first used as an anthem when Timor-Leste declared its independence from Portugal in 1975; the lyricist, Fransisco Borja DA COSTA, was killed in an Indonesian invasion just days after independence was declared

Economy ::

Economy - overview:

In late 1999, about 70% of the economic infrastructure of Timor-Leste was laid waste by Indonesian troops and anti-independence militias. Three hundred thousand people fled westward. Over the next three years a massive international program, manned by 5,000 peacekeepers (8,000 at peak) and 1,300 police officers, led to substantial reconstruction in both urban and rural areas. By the end of 2005, refugees had returned or had settled in Indonesia. The country continues to face great challenges in rebuilding its infrastructure, strengthening the civil administration, and generating jobs for young people entering the work force. The development of oil and gas resources in offshore waters has greatly supplemented government revenues. This technology-intensive industry, however, has done little to create jobs for the unemployed because there are no production facilities in Timor. Gas is piped to Australia. In June 2005, the National Parliament unanimously approved the creation of a Petroleum Fund to serve as a repository for all petroleum revenues and to preserve the value of Timor-Leste's petroleum wealth for future generations. The Fund held assets of US\$5.3 billion as of October 2009. The economy has been little impacted by the global financial crisis and continues to recover strongly from the mid-2006 outbreak of violence and civil unrest, which disrupted both private and public sector economic activity. The government in 2008 resettled tens of thousands of an estimated 100,000 internally displaced persons (IDPs); most IDPs returned home by early 2009. The underlying economic policy challenge the country faces remains how best to use oil-and-gas wealth to lift the non-oil economy onto a higher growth path and to reduce poverty.

Introduction ::

Background:

French Togoland became Togo in 1960. Gen. Gnassingbe EYADEMA, installed as military ruler in 1967, ruled Togo with a heavy hand for almost four decades. Despite the facade of multiparty elections instituted in the early 1990s, the government was largely dominated by President EYADEMA, whose Rally of the Togolese People (RPT) party has maintained power almost continually since 1967 and maintains a majority of seats in today's legislature. Upon EYADEMA's

death in February 2005, the military installed the president's son, Faure GNASSINGBE, and then engineered his formal election two months later. Democratic gains since then allowed Togo to hold its first relatively free and fair legislative elections in October 2007. After years of political unrest and condemnation from international organizations for human rights abuses, Togo is finally being re-welcomed into the international community.

Economy ::

Economy - overview:

This small, sub-Saharan economy suffers from anemic economic growth and depends heavily on both commercial and subsistence agriculture, which provides employment for 65% of the labor force. Some basic foodstuffs must still be imported. Cocoa, coffee, and cotton generate about 40% of export earnings with cotton being the most important cash crop. Togo is the world's fourth-largest producer of phosphate. The government's decade-long effort, supported by the World Bank and the IMF, to implement economic reform measures, encourage foreign investment, and bring revenues in line with expenditures has moved slowly. Progress depends on follow through on privatization, increased openness in government financial

operations, progress toward legislative elections, and continued support from foreign donors. Togo is on track with its IMF Extended Credit Facility and reached a HIPC debt relief completion point in 2010 at which 95% of the country's debt was forgiven. Economic growth prospects remain marginal due to declining cotton production and underinvestment in phosphate mining.

Introduction ::

Background:

Originally settled by Polynesian emigrants from surrounding island groups, the Tokelau Islands were made a British protectorate in 1889. They were transferred to New Zealand administration in 1925. Referenda held in 2006 and 2007 to change the status of the islands from that of a New Zealand territory to one of free association with New Zealand did not meet the needed threshold for approval.

Economy ::

Economy - overview:

Tokelau's small size (three villages), isolation, and lack of resources greatly restrain economic development and confine agriculture to the subsistence level. The people rely heavily on aid from New Zealand - about \$10 million annually in 2008 and 2009 - to maintain public services. New Zealand's support amounts to 80% of Tokelau's recurrent government budget. An international trust fund, currently worth nearly US\$32 million, was established in 2004 to provide Tokelau an independent source of revenue. The principal sources of revenue come from sales of copra, postage stamps, souvenir coins, and handicrafts. Money is also remitted to families from relatives in New Zealand.

(map)

Introduction ::

Background:

Tonga - unique among Pacific nations - never completely lost its indigenous governance. The archipelagos of "The Friendly Islands" were united into a Polynesian kingdom in 1845. Tonga became a constitutional monarchy in 1875 and a British protectorate in 1900; it withdrew from the protectorate and joined the Commonwealth of

Nations in 1970. Tonga remains the only monarchy in the Pacific.

Economy ::

Economy - overview:

Tonga has a small, open, South Pacific island economy. It has a narrow export base in agricultural goods. Squash, vanilla beans, and yams are the main crops. Agricultural exports, including fish, make up two-thirds of total exports. The country must import a high proportion of its food, mainly from New Zealand. The country remains dependent on external aid and remittances from Tongan communities overseas to offset its trade deficit. Tourism is the second-largest source of hard currency earnings following remittances. Tonga had 39,000 visitors in 2006. The government is emphasizing the development of the private sector, especially the encouragement of investment, and is committing increased funds for health and education. Tonga has a reasonably sound basic infrastructure and well developed social services. High unemployment among the young, a continuing upturn in inflation, pressures for democratic reform, and rising civil service expenditures are major issues facing the government.

an

Background:

First colonized by the Spanish, the islands came under British control in the early 19th century. The islands' sugar industry was hurt by the emancipation of the slaves in 1834. Manpower was replaced with the importation of contract laborers from India between 1845 and 1917, which boosted sugar production as well as the cocoa industry. The discovery of oil on Trinidad in 1910 added another important export. Independence was attained in 1962. The country is one of the most

prosperous in the Caribbean thanks largely to petroleum and natural gas production and processing. Tourism, mostly in Tobago, is targeted for expansion and is growing. The government is coping with a rise in violent crime.

Economy ::

Economy - overview:

Trinidad and Tobago has earned a reputation as an excellent investment site for international businesses and has one of the highest growth rates and per capita incomes in Latin America. Economic growth between 2000 and 2007 averaged slightly over 8%, significantly above the regional average of about 3.7% for that same period; however, GDP has slowed down since then and contracted about 3.5% in 2009, before rising more than 2% in 2010. Growth has been fueled by investments in liquefied natural gas (LNG), petrochemicals, and steel. Additional petrochemical, aluminum, and plastics projects are in various stages of planning. Trinidad and Tobago is the leading Caribbean producer of oil and gas, and its economy is heavily dependent upon these resources but it also supplies manufactured goods, notably food products and beverages, as well as cement to the Caribbean region. Oil and gas account for about 40% of GDP and 80% of exports, but only 5% of employment. The

country is also a regional financial center, and tourism is a growing sector, although it is not as important domestically as it is to many other Caribbean islands. The economy benefits from a growing trade surplus. The previous MANNING administration benefited from fiscal surpluses fueled by the dynamic export sector; however, declines in oil and gas prices have reduced government revenues which will challenge the new government's commitment to maintaining high levels of public investment.

Introduction ::

Background:

Rivalry between French and Italian interests in Tunisia culminated in a French invasion in 1881 and the creation of a protectorate. Agitation for independence in the decades following World War I was finally successful in getting the French to recognize Tunisia as an independent state in 1956. The country's first president, Habib BOURGUIBA, established a strict one-party state. He dominated the country for 31 years, repressing Islamic fundamentalism and establishing rights for women unmatched by any other Arab nation. In November 1987, BOURGUIBA was removed from office and replaced by Zine el Abidine BEN ALI in a bloodless coup. BEN ALI is currently serving his fifth consecutive five-year term as president. Tunisia has long taken a moderate, non-aligned stance in its foreign relations. Domestically, it has sought to defuse rising pressure for a more open political society.

Economy ::

Economy - overview:

Tunisia has a diverse economy, with important agricultural, mining, tourism, and manufacturing sectors. Governmental control of economic affairs while still heavy has gradually lessened over the past decade with increasing privatization, simplification of the tax structure, and a prudent approach to debt. Progressive social policies also have helped raise living conditions in Tunisia relative to the region. Real growth, which averaged almost 5% over the past decade,

declined to 4.6% in 2008 and to 3-4% in 2009-10 because of economic contraction and slowing of import demand in Europe - Tunisia's largest export market. However, development of non-textile manufacturing, a recovery in agricultural production, and strong growth in the services sector somewhat mitigated the economic effect of slowing exports. Tunisia will need to reach even higher growth levels to create sufficient employment opportunities for an already large number of unemployed as well as the growing population of university graduates. The challenges ahead include: privatizing industry, liberalizing the investment code to increase foreign investment, improving government efficiency, reducing the trade deficit, and reducing socioeconomic disparities in the impoverished south and west.

Introduction ::

Background:

Modern Turkey was founded in 1923 from the Anatolian remnants of the defeated Ottoman Empire by national hero Mustafa KEMAL, who was later honored with the title Atatürk or "Father of the Turks." Under his authoritarian leadership, the country adopted wide-ranging social, legal, and political reforms. After a period of one-party rule, an experiment with multi-party politics led to the 1950 election victory of the opposition Democratic Party and the peaceful transfer of power. Since then, Turkish political parties have multiplied, but democracy has been fractured by periods of instability and intermittent military coups (1960, 1971, 1980), which in each case eventually resulted in a return of political power to civilians. In 1997, the military again helped engineer the ouster - popularly dubbed a "post-modern coup" - of the then Islamic-oriented government. Turkey intervened militarily

on Cyprus in 1974 to prevent a Greek takeover of the island and has since acted as patron state to the "Turkish Republic of Northern Cyprus," which only Turkey recognizes. A separatist insurgency begun in 1984 by the Kurdistan Workers' Party (PKK) - now known as the People's Congress of Kurdistan or Kongra-Gel (KGK) - has dominated the Turkish military's attention and claimed more than 30,000 lives. After the capture of the group's leader in 1999, the insurgents largely withdrew from Turkey mainly to northern Iraq. In 2004, KGK announced an end to its ceasefire and attacks attributed to the KGK increased. Turkey joined the UN in 1945 and in 1952 it became a member of NATO. In 1964, Turkey became an associate member of the European Community. Over the past decade, it has undertaken many reforms to strengthen its democracy and economy; it began accession membership talks with the European Union in 2005.

note: lyrics adopted 1921, music adopted 1932; the anthem's original music was adopted in 1924; a new composition was agreed upon in 1932

Economy ::

Economy - overview:

Turkey's economy is increasingly driven by its industry and service sectors, although its traditional agriculture sector still accounts for about 30% of employment. An aggressive privatization program has reduced state involvement in basic industry, banking, transport, and communication, and an emerging cadre of middle-class entrepreneurs is adding a dynamism to the economy. Turkey's traditional textiles and clothing sectors still account for one-third of industrial employment, despite stiff competition in international markets that resulted from the end of the global quota system. Other sectors, notably the automotive, construction, and electronics industries, are rising in importance and have surpassed textiles within Turkey's

export mix. Oil began to flow through the Baku-Tbilisi-Ceyhan pipeline in May 2006, marking a major milestone that will bring up to 1 million barrels per day from the Caspian to market. Several gas pipelines also are being planned to help move Central Asian gas to Europe via Turkey, which will help address Turkey's dependence on energy imports over the long term. After Turkey experienced a severe financial crisis in 2001, Ankara adopted financial and fiscal reforms as part of an IMF program. The reforms strengthened the country's economic fundamentals and ushered in an era of strong growth - averaging more than 6% annually until 2009, when global economic conditions and tighter fiscal policy slowed growth to 4.7%, reduced inflation to 6.5% - a 34-year low - and cut the public sector debt-to-GDP ratio below 50%. Turkey's well-regulated financial markets and banking system weathered the global financial crisis and GDP rebounded strongly to 7.3% in 2010, as exports returned to normal levels following the recession. The economy, however, continues to be burdened by a high current account deficit and remains dependent on often volatile, short-term investment to finance its trade deficit. The stock value of FDI stood at \$174 billion at year-end 2010, but inflows have slowed considerably in light of continuing economic turmoil in Europe, the source of much of Turkey's FDI. Further economic and judicial reforms and prospective EU membership are expected to boost Turkey's attractiveness to foreign investors. However, Turkey's relatively high current account deficit, uncertainty related to policy-making, and fiscal imbalances leave the economy vulnerable to destabilizing shifts in investor confidence.

Military - note:

a "National Security Policy Document" adopted in October 2005 increases the Turkish Armed Forces (TSK) role in internal security, augmenting the General Directorate of Security and Gendarmerie General Command (Jandarma); the TSK leadership continues to play a key role in politics and considers itself guardian of Turkey's secular state; in April 2007, it warned the ruling party about any pro-Islamic appointments; despite on-going negotiations on EU accession since October 2005, progress has been limited in establishing required civilian supremacy over the military; primary domestic threats are listed as fundamentalism (with the definition in some dispute with the civilian government), separatism (the Kurdish problem), and the extreme left wing; Ankara strongly opposed establishment of an autonomous Kurdish region; an overhaul of the Turkish Land Forces Command (TLFC) taking place under the "Force 2014" program is to produce 20-30% smaller, more highly trained forces characterized by greater mobility and firepower and capable of joint and combined operations; the TLFC has taken on increasing international peacekeeping responsibilities, and took charge of a NATO International Security Assistance Force (ISAF) command in Afghanistan in April 2007; the Turkish Navy is a regional naval power that wants to develop the capability to project power beyond Turkey's coastal waters; the Navy is heavily involved in NATO, multinational,

and UN operations; its roles include control of territorial waters and security for sea lines of communications; the Turkish Air Force adopted an "Aerospace and Missile Defense Concept" in 2002 and has initiated project work on an integrated missile defense system; Air Force priorities include attaining a modern deployable, survivable, and sustainable force structure, and establishing a sustainable command and control system (2008)

Transnational Issues ::

Introduction ::

Background:

Eastern Turkmenistan for centuries formed part of the Persian province of Khurasan; in medieval times Merv (today known as Mary) was one of the great cities of the Islamic world and an important stop on the Silk Road. Annexed by Russia between 1865 and 1885, Turkmenistan became a Soviet republic in 1924. It achieved independence upon the dissolution of the USSR in 1991. Extensive hydrocarbon/natural gas reserves could prove a boon to this

underdeveloped country once extraction and delivery projects are expanded. The Turkmen Government is actively working to diversify its gas export routes beyond the still dominant Russian pipeline network. In 2010, new gas export pipelines that carry Turkmen gas to China and to northern Iran began operating, effectively ending the Russian monopoly on Turkmen gas exports. President for Life Saparmurat NYIAZOW died in December 2006, and Turkmenistan held its first multi-candidate presidential election in February 2007. Gurbanguly BERDIMUHAMEDOW, a deputy cabinet chairman under NYIAZOW, emerged as the country's new president.

Economy ::

Economy - overview:

Turkmenistan is largely a desert country with intensive agriculture in irrigated oases and sizeable gas and oil resources. The two largest crops are cotton, most of which is produced for export, and wheat, which is domestically consumed. Although agriculture accounts for roughly 10% of GDP, it continues to employ nearly half of the country's workforce. With an authoritarian ex-Communist regime in power and a tribally based social structure, Turkmenistan has taken a cautious approach to economic reform, hoping to use gas and cotton export revenues to sustain its inefficient economy. Privatization goals remain limited. From 1998-2005, Turkmenistan suffered from the continued lack of adequate export routes for natural gas and from obligations on extensive short-term external debt. At the same time, however, total exports rose by an average of roughly 15% per year from 2003-08, largely because of higher international oil and gas prices. New pipelines to China and Iran, that began operation in late 2009 and early 2010, have given Turkmenistan additional export routes for its gas, although these new routes have not offset the sharp

drop in export revenue since early 2009 from decreased gas exports to Russia. Overall prospects in the near future are discouraging because of widespread internal poverty, endemic corruption, a poor educational system, government misuse of oil and gas revenues, and Ashgabat's reluctance to adopt market-oriented reforms. In the past, Turkmenistan's economic statistics were state secrets. The new government has established a State Agency for Statistics, but GDP numbers and other figures are subject to wide margins of error. In particular, the rate of GDP growth is uncertain. Since his election, President BERDIMUHAMEDOW unified the country's dual currency exchange rate, ordered the redenomination of the manat, reduced state subsidies for gasoline, and initiated development of a special tourism zone on the Caspian Sea. Although foreign investment is encouraged, numerous bureaucratic obstacles impede international business activity.

Turks and Caicos Islands

Introduction ::

Background:

The islands were part of the UK's Jamaican colony until 1962, when they assumed the status of a separate crown colony upon Jamaica's independence. The governor of The Bahamas oversaw affairs from 1965 to 1973. With Bahamian independence, the islands received a separate governor in 1973. Although independence was agreed upon for 1982, the policy was reversed and the islands remain a British overseas territory.

Introduction ::

Background:

In 1974, ethnic differences within the British colony of the Gilbert and Ellice Islands caused the Polynesians of the Ellice Islands to vote for separation from the Micronesians of the Gilbert Islands. The following year, the Ellice Islands became the separate British colony of Tuvalu. Independence was granted in 1978. In 2000, Tuvalu negotiated a contract leasing its Internet domain name ".tv" for \$50 million in royalties over a 12-year period.

Natural hazards:

severe tropical storms are usually rare, but in 1997 there were three cyclones; low level of islands make them sensitive to changes in sea level

Environment - current issues:

since there are no streams or rivers and groundwater is not potable, most water needs must be met by catchment systems with storage facilities (the Japanese Government has built one desalination plant and plans to build one other); beachhead erosion because of the use of sand for building materials; excessive clearance of forest undergrowth for use as fuel; damage to coral reefs from the spread of the Crown of Thorns starfish; Tuvalu is concerned about global increases in greenhouse gas emissions and their effect on rising sea levels, which

threaten the country's underground water table; in 2000, the government appealed to Australia and New Zealand to take in Tuvaluans if rising sea levels should make evacuation necessary

Environment - international agreements:

party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Law of the Sea, Ozone Layer Protection, Ship Pollution, Whaling

Geography - note:

one of the smallest and most remote countries on Earth; six of the nine coral atolls - Nanumea, Nui, Vaitupu, Nukufetau, Funafuti, and Nukulaelae - have lagoons open to the ocean; Nanumaya and Niutao have landlocked lagoons; Niulakita does not have a lagoon

Economy ::

Economy - overview:

Tuvalu consists of a densely populated, scattered group of nine coral atolls with poor soil. The country has no known mineral resources and few exports and is almost entirely dependent upon imported food and fuel. Subsistence farming and fishing are the primary economic activities. Fewer than 1,000 tourists, on average, visit Tuvalu annually. Job opportunities are scarce and public sector workers make up most of those employed. About 15% of the adult male population work as seamen on merchant ships abroad, and remittances are a vital source of income contributing around \$2 million in 2007. Substantial income is received annually from the Tuvalu Trust Fund (TTF) an international trust fund established in 1987 by Australia, NZ, and the UK and supported also by Japan and South Korea. Thanks to wise investments and conservative withdrawals, this fund grew from an initial \$17 million to an estimated value of \$77 million in 2006. The TTF contributed nearly \$9 million towards the government budget in 2006 and is an important cushion for meeting shortfalls in the government's budget. The US Government is also a major revenue source for Tuvalu because of payments from a 1988 treaty on fisheries. In an effort to ensure financial stability and sustainability, the government is pursuing public sector reforms, including privatization of some government functions and personnel cuts. Tuvalu also derives royalties from the lease of its ".tv" Internet domain name with revenue of more than \$2 million in 2006. A minor source of government revenue comes from the sale of stamps and coins. With merchandise exports only a fraction of merchandise imports, continued reliance must be placed on fishing and telecommunications license fees, remittances from overseas workers, official transfers, and income from overseas investments. Growing income disparities and the vulnerability of the country to climatic change are among leading concerns for the nation.

Uganda

Introduction ::

Background:

The colonial boundaries created by Britain to delimit Uganda grouped together a wide range of ethnic groups with different political systems and cultures. These differences prevented the establishment of a working political community after independence was achieved in 1962. The dictatorial regime of Idi AMIN (1971-79) was responsible for the deaths of some 300,000 opponents; guerrilla war and human rights abuses under Milton OBOTE (1980-85) claimed at least another

100,000 lives. The rule of Yoweri MUSEVENI since 1986 has brought relative stability and economic growth to Uganda. During the 1990s, the government promulgated non-party presidential and legislative elections.

Economy ::

Economy - overview:

Uganda has substantial natural resources, including fertile soils, regular rainfall, small deposits of copper, gold, and other minerals, and recently discovered oil. Uganda has never conducted a national minerals survey. Agriculture is the most important sector of the economy, employing over 80% of the work force. Coffee accounts for

the bulk of export revenues. Since 1986, the government - with the support of foreign countries and international agencies - has acted to rehabilitate and stabilize the economy by undertaking currency reform, raising producer prices on export crops, increasing prices of petroleum products, and improving civil service wages. The policy changes are especially aimed at dampening inflation and boosting production and export earnings. Since 1990 economic reforms ushered in an era of solid economic growth based on continued investment in infrastructure, improved incentives for production and exports, lower inflation, better domestic security, and the return of exiled Indian-Ugandan entrepreneurs. Uganda has received about \$2 billion in multilateral and bilateral debt relief. In 2007 Uganda received \$10 million for a Millennium Challenge Account Threshold Program. The global economic downturn has hurt Uganda's exports; however, Uganda's GDP growth is still relatively strong due to past reforms and sound management of the downturn. Oil revenues and taxes will become a larger source of government funding as oil comes on line in the next few years. Instability in southern Sudan is the biggest risk for the Ugandan economy in 2011 because Uganda's main export partner is Sudan and Uganda is a key destination for Sudanese refugees.

Introduction ::

Background:

Ukraine was the center of the first eastern Slavic state, Kyivan Rus, which during the 10th and 11th centuries was the largest and most powerful state in Europe. Weakened by internecine quarrels and Mongol invasions, Kyivan Rus was incorporated into the Grand Duchy of Lithuania and eventually into the Polish-Lithuanian Commonwealth. The cultural and religious legacy of Kyivan Rus laid the foundation for Ukrainian nationalism through subsequent centuries. A new Ukrainian state, the Cossack Hetmanate, was established during the mid-17th century after an uprising against the Poles. Despite continuous Muscovite pressure, the Hetmanate managed to remain autonomous for well over 100 years. During the latter part of the 18th century, most Ukrainian ethnographic territory was absorbed by the Russian Empire. Following the collapse of czarist

Russia in 1917, Ukraine was able to achieve a short-lived period of independence (1917-20), but was reconquered and forced to endure a brutal Soviet rule that engineered two forced famines (1921-22 and 1932-33) in which over 8 million died. In World War II, German and Soviet armies were responsible for some 7 to 8 million more deaths. Although final independence for Ukraine was achieved in 1991 with the dissolution of the USSR, democracy and prosperity remained elusive as the legacy of state control and endemic corruption stalled efforts at economic reform, privatization, and civil liberties. A peaceful mass protest "Orange Revolution" in the closing months of 2004 forced the authorities to overturn a rigged presidential election and to allow a new internationally monitored vote that swept into power a reformist slate under Viktor YUSHCHENKO. Subsequent internal squabbles in the YUSHCHENKO camp allowed his rival Viktor YANUKOVYCH to stage a comeback in parliamentary elections and become prime minister in August of 2006. An early legislative election, brought on by a political crisis in the spring of 2007, saw Yuliya TYMOSHENKO, as head of an "Orange" coalition, installed as a new prime minister in December 2007. Viktor YANUKOVYCH was elected president in a February 2010 run-off election that observers assessed as meeting most international standards. The following month, the Rada approved a vote of no-confidence prompting Yuliya TYMOSHENKO to resign from her post as prime minister.

Economy ::

Economy - overview:

After Russia, the Ukrainian republic was far and away the most important economic component of the former Soviet Union, producing about four times the output of the next-ranking republic. Its fertile black soil generated more than one-fourth of Soviet agricultural output, and its farms provided substantial quantities of meat, milk, grain, and vegetables to other republics. Likewise, its diversified heavy industry supplied the unique equipment (for example, large diameter

pipes) and raw materials to industrial and mining sites (vertical drilling apparatus) in other regions of the former USSR. Shortly after independence in August 1991, the Ukrainian Government liberalized most prices and erected a legal framework for privatization, but widespread resistance to reform within the government and the legislature soon stalled reform efforts and led to some backtracking. Output by 1999 had fallen to less than 40% of the 1991 level. Ukraine's dependence on Russia for energy supplies and the lack of significant structural reform have made the Ukrainian economy vulnerable to external shocks. Ukraine depends on imports to meet about three-fourths of its annual oil and natural gas requirements and 100% of its nuclear fuel needs. After a two-week dispute that saw gas supplies cutoff to Europe, Ukraine agreed to ten-year gas supply and transit contracts with Russia in January 2009 that brought gas prices to "world" levels. The strict terms of the contracts have further hobbled Ukraine's cash-strapped state gas company, Naftohaz. Outside institutions - particularly the IMF - have encouraged Ukraine to quicken the pace and scope of reforms. Ukrainian Government officials eliminated most tax and customs privileges in a March 2005 budget law, bringing more economic activity out of Ukraine's large shadow economy, but more improvements are needed, including fighting corruption, developing capital markets, and improving the legislative framework. Ukraine's economy was buoyant despite political turmoil between the prime minister and president until mid-2008. Real GDP growth exceeded 7% in 2006-07, fueled by high global prices for steel - Ukraine's top export - and by strong domestic consumption, spurred by rising pensions and wages. Ukraine reached an agreement with the IMF for a \$16.4 billion Stand-By Arrangement in November 2008 to deal with the economic crisis, but the Ukrainian Government's lack of progress in implementing reforms has twice delayed the release of IMF assistance funds. The drop in steel prices and Ukraine's exposure to the global financial crisis due to aggressive foreign borrowing lowered growth in 2008 and the economy contracted more than 15% in 2009, among the worst economic performances in the world; growth resumed in 2010, buoyed by exports. External conditions are likely to hamper efforts for economic recovery in 2011.

country comparison to the world: 20

Telephones - mobile cellular:

55.333 million (2009)

country comparison to the world: 20

Telephone system:

general assessment: Ukraine's telecommunication development plan emphasizes improving domestic trunk lines, international connections, and the mobile-cellular system

domestic: at independence in December 1991, Ukraine inherited a telephone system that was antiquated, inefficient, and in disrepair; more than 3.5 million applications for telephones could not be satisfied; telephone density is rising and the domestic trunk system is being improved; about one-third of Ukraine's networks are digital and a majority of regional centers now have digital switching stations; improvements in local networks and local exchanges continue to lag; the mobile-cellular telephone system's expansion has slowed, largely due to saturation of the market which has reached 120 mobile phones per 100 people

international: country code - 380; 2 new domestic trunk lines are a part of the fiber-optic Trans-Asia-Europe (TAE) system and 3 Ukrainian links have been installed in the fiber-optic Trans-European Lines (TEL) project that connects 18 countries; additional international service is provided by the Italy-Turkey-Ukraine-Russia (ITUR) fiber-optic submarine cable and by an unknown number of earth stations in the Intelsat, Inmarsat, and Intersputnik satellite systems

Broadcast media:

TV coverage is provided by Ukraine's state-controlled nationwide broadcast channel (UT1) and a number of privately-owned television broadcast networks; Russian television broadcasts have a small audience nationwide, but larger audiences in the eastern and southern regions; multi-channel cable and satellite TV services are available; Ukraine's radio broadcast market, a mix of independent and state-owned networks, is comprised of some 300 stations (2007)

Transnational Issues ::

Disputes - international:

1997 boundary delimitation treaty with Belarus remains un-ratified due to unresolved financial claims, stalling demarcation and reducing

border security; delimitation of land boundary with Russia is complete with preparations for demarcation underway; the dispute over the boundary between Russia and Ukraine through the Kerch Strait and Sea of Azov remains unresolved despite a December 2003 framework agreement and ongoing expert-level discussions; Moldova and Ukraine operate joint customs posts to monitor transit of people and commodities through Moldova's break-away Transnistria Region, which remains under OSCE supervision; the ICJ gave Ukraine until December 2006 to reply, and Romania until June 2007 to rejoin, in their dispute submitted in 2004 over Ukrainian-administered Zmiynyy/Serpilor (Snake) Island and Black Sea maritime boundary; Romania opposes Ukraine's reopening of a navigation canal from the Danube border through Ukraine to the Black Sea

Illicit drugs:

limited cultivation of cannabis and opium poppy, mostly for CIS consumption; some synthetic drug production for export to the West; limited government eradication program; used as transshipment point for opiates and other illicit drugs from Africa, Latin America, and Turkey to Europe and Russia; Ukraine has improved anti-money-laundering controls, resulting in its removal from the Financial Action Task Force's (FATF's) Noncooperative Countries and Territories List in February 2004; Ukraine's anti-money-laundering regime continues to be monitored by FATF

United Arab Emirates

(map)

Introduction ::

Background:

The Trucial States of the Persian Gulf coast granted the UK control of their defense and foreign affairs in 19th century treaties. In 1971, six of these states - Abu Zaby, 'Ajman, Al Fujayrah, Ash Shariqah, Dubayy, and Umm al Qaywayn - merged to form the United Arab Emirates (UAE). They were joined in 1972 by Ra's al Khaymah. The UAE's per capita GDP is on par with those of leading West European nations. Its generosity with oil revenues and its moderate foreign policy stance have allowed the UAE to play a vital role in the affairs of the region. For more than three decades, oil and global finance drove the UAE's economy, however, in 2008-09, the confluence of falling oil prices, collapsing real estate prices, and the international banking crisis hit the UAE especially hard.

Economy ::

Economy - overview:

The UAE has an open economy with a high per capita income and a sizable annual trade surplus. Successful efforts at economic diversification have reduced the portion of GDP based on oil and gas output to 25%. Since the discovery of oil in the UAE more than 30 years ago, the UAE has undergone a profound transformation from an impoverished region of small desert principalities to a modern state with a high standard of living. The government has increased spending on job creation and infrastructure expansion and is opening up utilities to greater private sector involvement. In April 2004, the UAE signed a Trade and Investment Framework Agreement with Washington and in November 2004 agreed to undertake negotiations toward a Free Trade Agreement with the US, however, those talks have not moved forward. The country's Free Trade Zones - offering 100% foreign ownership and zero taxes - are helping to attract foreign investors. The global financial crisis, tight international credit, and deflated asset prices slowed GDP growth in 2010. UAE authorities tried to blunt the crisis by increasing spending and boosting liquidity in the banking sector. The crisis hit Dubai hardest, as it was heavily exposed to depressed real estate prices. Dubai lacked sufficient cash to meet its debt obligations, prompting global concern about its solvency. The UAE Central Bank and Abu Dhabi-based banks bought the largest shares. In December 2009 Dubai received an additional \$10 billion loan from the emirate of Abu Dhabi. The economy is expected to continue a slow rebound. Dependence on oil, a large expatriate workforce, and growing inflation pressures are significant long-term challenges. The UAE's strategic plan for the next few years focuses on diversification and creating more opportunities for

nationals through improved education and increased private sector employment.

Transnational Issues ::

Disputes - international:

boundary agreement was signed and ratified with Oman in 2003 for entire border, including Oman's Musandam Peninsula and Al Madhah enclaves, but contents of the agreement and detailed maps showing the alignment have not been published; Iran and UAE dispute Tunb Islands and Abu Musa Island, which Iran occupies

Illicit drugs:

the UAE is a drug transshipment point for traffickers given its proximity to Southwest Asian drug-producing countries; the UAE's position as a major financial center makes it vulnerable to money laundering; anti-money-laundering controls improving, but informal banking remains unregulated

Introduction ::

Background:

The United Kingdom has historically played a leading role in developing parliamentary democracy and in advancing literature and science. At its zenith in the 19th century, the British Empire stretched over one-fourth of the earth's surface. The first half of the 20th century saw the UK's strength seriously depleted in two World Wars and the Irish republic withdraw from the union. The second half witnessed the dismantling of the Empire and the UK rebuilding itself into a modern and prosperous European nation. As one of five permanent members of the UN Security Council, a founding member of NATO, and of the Commonwealth, the UK pursues a global approach to foreign policy. The UK is also an active member of the EU, although it chose to remain outside the Economic and Monetary Union. The Scottish Parliament, the National Assembly for Wales, and the Northern Ireland Assembly were established in 1999. The latter was suspended until May 2007 due to wrangling over the peace process, but devolution was fully completed in March 2010.

Economy ::

Economy - overview:

The UK, a leading trading power and financial center, is the third largest economy in Europe after Germany and France. Over the past two decades, the government has greatly reduced public ownership and contained the growth of social welfare programs. Agriculture is intensive, highly mechanized, and efficient by European standards, producing about 60% of food needs with less than 2% of the labor force. The UK has large coal, natural gas, and oil resources, but its oil and natural gas reserves are declining and the UK became a net importer of energy in 2005. Services, particularly banking, insurance, and business services, account by far for the largest proportion of GDP while industry continues to decline in importance. After emerging from recession in 1992, Britain's economy enjoyed the longest period of expansion on record during which time growth outpaced most of Western Europe. In 2008, however, the global financial crisis hit the economy particularly hard, due to the importance of its financial sector. Sharply declining home prices, high consumer debt, and the global economic slowdown compounded Britain's economic problems, pushing the economy into recession in the latter half of 2008 and prompting the then BROWN government to implement a number of measures to stimulate the economy and stabilize the financial markets;

these include nationalizing parts of the banking system, cutting taxes, suspending public sector borrowing rules, and moving forward public spending on capital projects. Facing burgeoning public deficits and debt levels, the CAMERON government in 2010 initiated a five-year austerity program, which aims to lower London's budget deficit from over 11% of GDP in 2010 to nearly 1% by 2015. The Bank of England periodically coordinates interest rate moves with the European Central Bank, but Britain remains outside the European Economic and Monetary Union (EMU).

Introduction ::

Background:

Britain's American colonies broke with the mother country in 1776 and were recognized as the new nation of the United States of America following the Treaty of Paris in 1783. During the 19th and 20th centuries, 37 new states were added to the original 13 as the nation expanded across the North American continent and acquired a number of overseas possessions. The two most traumatic experiences in the nation's history were the Civil War (1861-65), in which a northern Union of states defeated a secessionist Confederacy of 11 southern slave states, and the Great Depression of the 1930s, an economic downturn during which about a quarter of the labor force lost its jobs. Buoyed by victories in World Wars I and II and the end of the Cold War in 1991, the US remains the world's most powerful nation state. Over a span of more than five decades, the economy has

achieved steady growth, low unemployment and inflation, and rapid advances in technology.

continental shelf: not specified

Climate:**Current Weather**

mostly temperate, but tropical in Hawaii and Florida, arctic in Alaska, semiarid in the great plains west of the Mississippi River, and arid in the Great Basin of the southwest; low winter temperatures in the northwest are ameliorated occasionally in January and February by warm chinook winds from the eastern slopes of the Rocky Mountains

Terrain:

vast central plain, mountains in west, hills and low mountains in east; rugged mountains and broad river valleys in Alaska; rugged, volcanic topography in Hawaii

Elevation extremes:

lowest point: Death Valley -86 m

highest point: Mount McKinley 6,194 m

note: the peak of Mauna Kea (4,207 m above sea level) on the island of Hawaii rises about 10,200 m above the Pacific Ocean floor; by this measurement, it is the world's tallest mountain - higher than Mount Everest, which is recognized as the tallest mountain above sea level

Natural resources:

coal, copper, lead, molybdenum, phosphates, rare earth elements, uranium, bauxite, gold, iron, mercury, nickel, potash, silver, tungsten, zinc, petroleum, natural gas, timber

note: the US has the world's largest coal reserves with 491 billion short tons accounting for 27% of the world's total

Land use:

arable land: 18.01%

permanent crops: 0.21%

other: 81.78% (2005)

Irrigated land:

223,850 sq km (2003)

Total renewable water resources:

3,069 cu km (1985)

Freshwater withdrawal (domestic/industrial/agricultural):

total: 477 cu km/yr (13%/46%/41%)

per capita: 1,600 cu m/yr (2000)

Natural hazards:

tsunamis; volcanoes; earthquake activity around Pacific Basin; hurricanes along the Atlantic and Gulf of Mexico coasts; tornadoes in the Midwest and Southeast; mud slides in California; forest fires in the west; flooding; permafrost in northern Alaska, a major impediment to development

volcanism: the United States experiences volcanic activity in the Hawaiian Islands, Western Alaska, the Pacific Northwest, and in the Northern Mariana Islands; both Mauna Loa (elev. 4,170 m, 13,678 ft) in Hawaii and Mount Rainier (elev. 4,392 m, 14,409 ft) in Washington have been deemed "Decade Volcanoes" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to their explosive history and close proximity to human populations; Pavlof (elev. 2,519 m, 8,264 ft) is the most active volcano in Alaska's Aleutian Arc and poses a significant threat to air travel since the area constitutes a major flight path between North America and East Asia; St. Helens (elev. 2,549 m, 8,363 ft), famous for the devastating 1980 eruption, remains active today; numerous other historically active volcanoes exist, mostly concentrated in the Aleutian arc and Hawaii; they include: in Alaska: Aniakchak, Augustine,

Chiginagak, Fourpeaked, Iliamna, Katmai, Kupreanof, Martin, Novarupta, Redoubt, Spurr, Wrangell; in Hawaii: Trident, Ugashik-Peulik, Ukinrek Maars, Veniaminof; in the Northern Mariana Islands: Anatahan; and in the Pacific Northwest: Mount Baker, Mount Hood

Environment - current issues:

air pollution resulting in acid rain in both the US and Canada; the US is the largest single emitter of carbon dioxide from the burning of fossil fuels; water pollution from runoff of pesticides and fertilizers; limited natural fresh water resources in much of the western part of the country require careful management; desertification

Environment - international agreements:

party to: Air Pollution, Air Pollution-Nitrogen Oxides, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Climate Change, Desertification, Endangered Species, Environmental Modification, Marine Dumping, Marine Life Conservation, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling

signed, but not ratified: Air Pollution-Persistent Organic Pollutants, Air Pollution-Volatile Organic Compounds, Biodiversity, Climate Change-Kyoto Protocol, Hazardous Wastes

Geography - note:

world's third-largest country by size (after Russia and Canada) and by population (after China and India); Mt. McKinley is highest point in North America and Death Valley the lowest point on the continent

"The Anacreontic Song;" only the first verse is sung

Economy ::

Economy - overview:

The US has the largest and most technologically powerful economy in the world, with a per capita GDP of \$47,400. In this market-oriented economy, private individuals and business firms make most of the decisions, and the federal and state governments buy needed goods and services predominantly in the private marketplace. US business firms enjoy greater flexibility than their counterparts in Western Europe and Japan in decisions to expand capital plant, to lay off surplus workers, and to develop new products. At the same time, they face higher barriers to enter their rivals' home markets than foreign firms face entering US markets. US firms are at or near the forefront in technological advances, especially in computers and in medical, aerospace, and military equipment; their advantage has narrowed since the end of World War II. The onrush of technology largely explains the gradual development of a "two-tier labor market" in which those at the bottom lack the education and the professional/technical skills of those at the top and, more and more, fail to get comparable pay raises, health insurance coverage, and other benefits. Since 1975, practically all the gains in household income have gone to the top 20% of households. The war in March-April 2003 between a US-led coalition and Iraq, and the subsequent occupation of Iraq, required major shifts in national resources to the military. Soaring oil prices between 2005 and the first half of 2008 threatened inflation and unemployment, as higher gasoline prices ate into consumers' budgets. Imported oil accounts for about 60% of US consumption. Long-term problems include inadequate investment in economic infrastructure, rapidly rising medical and pension costs of an aging population, sizable trade and budget deficits, and stagnation of family income in the lower economic groups. The merchandise trade deficit reached a record \$840 billion in 2008 before shrinking to \$506 billion in 2009, and ramping back up to \$630 billion in 2010. The global economic downturn, the sub-prime mortgage crisis, investment bank failures, falling home prices, and tight credit pushed the United States into a recession by mid-2008. GDP contracted until the third quarter of 2009, making this the deepest and longest downturn since the Great Depression. To help stabilize financial markets, the US Congress established a \$700 billion Troubled Asset Relief Program (TARP) in October 2008. The government used some of these funds to purchase equity in US banks and other industrial corporations, much of which

had been returned to the government by early 2011. In January 2009 the US Congress passed and President Barack OBAMA signed a bill providing an additional \$787 billion fiscal stimulus to be used over 10 years - two-thirds on additional spending and one-third on tax cuts - to create jobs and to help the economy recover. Approximately two-thirds of these funds were injected into the economy by the end of 2010. In March 2010, President OBAMA signed a health insurance reform bill into law that will extend coverage to an additional 32 million American citizens by 2016, through private health insurance for the general population and Medicaid for the impoverished. In July 2010, the president signed the DODD-FRANK Wall Street Reform and Consumer Protection Act, a bill designed to promote financial stability by protecting consumers from financial abuses, ending taxpayer bailouts of financial firms, dealing with troubled banks that are "too big to fail," and improving accountability and transparency in the financial system - in particular, by requiring certain financial derivatives to be traded in markets that are subject to government regulation and oversight. In late 2010, the US Federal Reserve Bank (The Fed) announced that it would purchase \$600 billion worth of US Government bonds by June 2011, in an attempt to keep interest rates from rising and snuffing out the nascent recovery.

Transnational Issues ::

Disputes - international:

the U.S. has intensified domestic security measures and is collaborating closely with its neighbors, Canada and Mexico, to monitor and control legal and illegal personnel, transport, and commodities across the international borders; abundant rainfall in recent years along much of the Mexico-US border region has ameliorated periodically strained water-sharing arrangements; 1990

Maritime Boundary Agreement in the Bering Sea still awaits Russian Duma ratification; managed maritime boundary disputes with Canada at Dixon Entrance, Beaufort Sea, Strait of Juan de Fuca, and around the disputed Machias Seal Island and North Rock; The Bahamas and US have not been able to agree on a maritime boundary; US Naval Base at Guantanamo Bay is leased from Cuba and only mutual agreement or US abandonment of the area can terminate the lease; Haiti claims US-administered Navassa Island; US has made no territorial claim in Antarctica (but has reserved the right to do so) and does not recognize the claims of any other states; Marshall Islands claims Wake Island; Tokelau included American Samoa's Swains Island among the islands listed in its 2006 draft constitution

Refugees and internally displaced persons:

refugees (country of origin): the US admitted 62,643 refugees during FY04/05 including; 10,586 (Somalia); 8,549 (Laos); 6,666 (Russia); 6,479 (Cuba); 3,100 (Haiti); 2,136 (Iran) (2006)

United States Pacific Island Wildlife Refuges

>

(map)

Introduction ::

Background:

All of the following US Pacific island territories except Midway Atoll constitute the Pacific Remote Islands National Wildlife Refuge (NWR) Complex and as such are managed by the Fish and Wildlife Service of the US Department of the Interior. Midway Atoll NWR has been included in a Refuge Complex with the Hawaiian Islands NWR and

also designated as part of Papahānaumokuākea Marine National Monument. These remote refuges are the most widespread collection of marine- and terrestrial-life protected areas on the planet under a single country's jurisdiction. They sustain many endemic species including corals, fish, shellfish, marine mammals, seabirds, water birds, land birds, insects, and vegetation not found elsewhere.

Baker Island: The US took possession of the island in 1857. Its guano deposits were mined by US and British companies during the second half of the 19th century. In 1935, a short-lived attempt at colonization began on this island but was disrupted by World War II and thereafter abandoned. The island was established as a NWR in 1974.

Howland Island: Discovered by the US early in the 19th century, the uninhabited atoll was officially claimed by the US in 1857. Both US and British companies mined for guano deposits until about 1890. In 1935, a short-lived attempt at colonization began on this island, similar to the effort on nearby Baker Island, but was disrupted by World War II and thereafter abandoned. The famed American aviatrix Amelia EARHART disappeared while seeking out Howland Island as a refueling stop during her 1937 round-the-world flight; Earhart Light, a day beacon near the middle of the west coast, was named in her memory. The island was established as a NWR in 1974.

Jarvis Island: First discovered by the British in 1821, the uninhabited island was annexed by the US in 1858 but abandoned in 1879 after tons of guano had been removed. The UK annexed the island in 1889 but never carried out plans for further exploitation. The US occupied and reclaimed the island in 1935. It was abandoned in 1942 during World War II. The island was established as a NWR in 1974.

Johnston Atoll: Both the US and the Kingdom of Hawaii annexed Johnston Atoll in 1858, but it was the US that mined the guano deposits until the late 1880s. Johnston and Sand Islands were designated wildlife refuges in 1926. The US Navy took over the atoll in 1934. Subsequently, the US Air Force assumed control in 1948. The site was used for high-altitude nuclear tests in the 1950s and 1960s. Until late in 2000 the atoll was maintained as a storage and disposal site for chemical weapons. Munitions destruction, cleanup, and closure of the facility were completed by May 2005. The Fish and Wildlife Service and the US Air Force are currently discussing future management options; in the interim, Johnston Atoll and the three-mile Naval Defensive Sea around it remain under the jurisdiction and administrative control of the US Air Force.

Kingman Reef: The US annexed the reef in 1922. Its sheltered lagoon served as a way station for flying boats on Hawaii-to-American Samoa flights during the late 1930s. There are no terrestrial plants on the reef, which is frequently awash, but it does support abundant and diverse marine fauna and flora. In 2001, the waters surrounding the reef out to 12 nm were designated a US NWR.

Midway Islands: The US took formal possession of the islands in 1867. The laying of the trans-Pacific cable, which passed through the islands, brought the first residents in 1903. Between 1935 and 1947, Midway was used as a refueling stop for trans-Pacific flights. The US naval victory over a Japanese fleet off Midway in 1942 was one of the turning points of World War II. The islands continued to serve as a naval station until closed in 1993. Today the islands are a NWR and are the site of the world's largest Laysan albatross colony.

Palmyra Atoll: The Kingdom of Hawaii claimed the atoll in 1862, and the US included it among the Hawaiian Islands when it annexed the archipelago in 1898. The Hawaii Statehood Act of 1959 did not include Palmyra Atoll, which is now partly privately owned by the Nature Conservancy with the rest owned by the Federal government and managed by the US Fish and Wildlife Service. These organizations are managing the atoll as a wildlife refuge. The lagoons and surrounding waters within the 12 nm US territorial seas were transferred to the US Fish and Wildlife Service and designated as a NWR in January 2001.

Geography - note:

Baker, Howland, and Jarvis Islands: scattered vegetation consisting of grasses, prostrate vines, and low growing shrubs; primarily a nesting, roosting, and foraging habitat for seabirds, shorebirds, and marine wildlife; closed to the public

Johnston Atoll: Johnston Island and Sand Island are natural islands, which have been expanded by coral dredging; North Island (Akau) and East Island (Hikina) are manmade islands formed from coral

dredging; the egg-shaped reef is 34 km in circumference; closed to the public

Kingman Reef: barren coral atoll with deep interior lagoon; closed to the public

Midway Islands: a coral atoll managed as a NWR and open to the public for wildlife-related recreation in the form of wildlife observation and photography

Palmyra Atoll: the high rainfall and resulting lush vegetation make the environment of this atoll unique among the US Pacific Island territories; supports a large undisturbed stand of *Pisonia* beach forest

Uruguay

>

Introduction ::

Background:

Montevideo, founded by the Spanish in 1726 as a military stronghold, soon took advantage of its natural harbor to become an important commercial center. Claimed by Argentina but annexed by Brazil in 1821, Uruguay declared its independence four years later and secured its freedom in 1828 after a three-year struggle. The administrations of President Jose BATLLE in the early 20th century established widespread political, social, and economic reforms that established a

statist tradition. A violent Marxist urban guerrilla movement named the Tupamaros, launched in the late 1960s, led Uruguay's president to cede control of the government to the military in 1973. By yearend, the rebels had been crushed, but the military continued to expand its hold over the government. Civilian rule was not restored until 1985. In 2004, the left-of-center Frente Amplio Coalition won national elections that effectively ended 170 years of political control previously held by the Colorado and Blanco parties. Uruguay's political and labor conditions are among the freest on the continent.

Flag description:

nine equal horizontal stripes of white (top and bottom) alternating with blue; a white square in the upper hoist-side corner with a yellow sun bearing a human face known as the Sun of May with 16 rays that alternate between triangular and wavy; the stripes represent the nine original departments of Uruguay; the sun symbol evokes the legend of the sun breaking through the clouds on 25 May 1810 as independence was first declared from Spain (Uruguay subsequently won its independence from Brazil)

note: the banner was inspired by the national colors of Argentina and by the design of the US flag

National anthem:

name: "Himno Nacional" (National Anthem of Uruguay)

lyrics/music: Francisco Esteban ACUNA de Figueroa/Francisco Jose DEBALI

note: adopted 1848; the anthem is also known as "Orientales, la Patria o la tumba!" ("Uruguayans, the Fatherland or Death!"); it is the world's

longest national anthem in terms of music (105 bars; almost five minutes); generally only the first verse and chorus are sung

Economy ::

Economy - overview:

Uruguay's economy is characterized by an export-oriented agricultural sector, a well-educated work force, and high levels of social spending. After averaging growth of 5% annually during 1996-98, in 1999-2002 the economy suffered a major downturn, stemming largely from the spillover effects of the economic problems of its large neighbors, Argentina and Brazil. In 2001-02, Argentine citizens made massive withdrawals of dollars deposited in Uruguayan banks after bank deposits in Argentina were frozen, which led to a plunge in the Uruguayan peso, a banking crisis, and a sharp economic contraction. Real GDP fell in four years by nearly 20%, with 2002 the worst year. The unemployment rate rose, inflation surged, and the burden of external debt doubled. Financial assistance from the IMF helped stem the damage. Uruguay restructured its external debt in 2003 without asking creditors to accept a reduction on the principal. Economic growth for Uruguay resumed, and averaged 8% annually during the period 2004-08. The 2008-09 global financial crisis put a brake on Uruguay's vigorous growth, which decelerated to 2.9% in 2009. Nevertheless, the country managed to avoid a recession and keep positive growth rates, mainly through higher public expenditure and investment, and GDP growth exceeded 7% in 2010.

Transnational Issues ::

Disputes - international:

in Jan 2007, ICJ provisionally ruled Uruguay may begin construction of two paper mills on the Uruguay River, which forms the border with Argentina, while the court examines further whether Argentina has the legal right to stop such construction with potential environmental implications to both countries; two uncontested boundary disputes with Brazil over Isla Brasilera at the tripoint with Argentina at the confluence of the Quarai/Cuareim and Uruguay rivers, and, in the 235 square kilometer Invernada River region, over which tributary represents the legitimate source of the Quarai/Cuareim River

Illicit drugs:

small-scale transit country for drugs mainly bound for Europe, often through sea-borne containers; law enforcement corruption; money laundering because of strict banking secrecy laws; weak border control along Brazilian frontier; increasing consumption of cocaine base and synthetic drugs

Introduction ::

Background:

Russia conquered the territory of present-day Uzbekistan in the late 19th century. Stiff resistance to the Red Army after the Bolshevik Revolution was eventually suppressed and a socialist republic established in 1924. During the Soviet era, intensive production of "white gold" (cotton) and grain led to overuse of agrochemicals and the depletion of water supplies, which have left the land poisoned and the Aral Sea and certain rivers half dry. Independent since 1991, the country seeks to gradually lessen its dependence on agriculture while developing its mineral and petroleum reserves. Current concerns include terrorism by Islamic militants, economic stagnation, and the curtailment of human rights and democratization.

note: adopted 1992; after the fall of the Soviet Union, Uzbekistan kept the music of the anthem from its time as a Soviet Republic but adopted new lyrics

Economy ::

Economy - overview:

Uzbekistan is a dry, landlocked country; 11% of the land is intensely cultivated, in irrigated river valleys. More than 60% of the population lives in densely populated rural communities. Export of hydrocarbons, including natural gas and petroleum, provided about 40% of foreign exchange earnings in 2009. Other major export earners include gold and cotton. Uzbekistan is now the world's second-largest cotton exporter and fifth largest producer; it has come under increasing international criticism for the use of child labor in its annual cotton harvest. Nevertheless, Uzbekistan enjoyed a bumper cotton crop in 2010 amidst record high prices. Following independence in September 1991, the government sought to prop up its Soviet-style command economy with subsidies and tight controls on production and prices. While aware of the need to improve the investment climate, the government still sponsors measures that often increase, not decrease, its control over business decisions. A sharp increase in the inequality of income distribution has hurt the lower ranks of society since independence. In 2003, the government accepted Article VIII obligations under the IMF, providing for full currency convertibility. However, strict currency controls and tightening of borders have lessened the effects of convertibility and have also led to some

shortages that have further stifled economic activity. The Central Bank often delays or restricts convertibility, especially for consumer goods. Potential investment by Russia and China in Uzbekistan's gas and oil industry, as well as increased cooperation with South Korea in the realm of civil aviation, may boost growth prospects. However, decreased demand for natural gas in Europe and Russia in the wake of the global financial crisis could reduce energy-related revenues in the near term. In November 2005, Russian President Vladimir PUTIN and Uzbekistan President KARIMOV signed an "alliance," which included provisions for economic and business cooperation. Russian businesses have shown increased interest in Uzbekistan, especially in mining, telecom, and oil and gas. In 2006, Uzbekistan took steps to rejoin the Collective Security Treaty Organization (CSTO) and the Eurasian Economic Community (EurASEC), which it subsequently left in 2008, both organizations dominated by Russia. In the past Uzbek authorities had accused US and other foreign companies operating in Uzbekistan of violating Uzbek tax laws and have frozen their assets, but no new expropriations occurred in 2008-09. Instead, the Uzbek Government has actively courted several major U.S. and international corporations, offering attractive financing and tax advantages, and has landed a significant US investment in the automotive industry. Although growth slowed in 2009-10, Uzbekistan has seen few other effects from the global economic downturn, primarily due to its relative isolation from the global financial markets.

Transnational Issues ::

Disputes - international:

prolonged drought and cotton monoculture in Uzbekistan and Turkmenistan creates water-sharing difficulties for Amu Darya river states; field demarcation of the boundaries with Kazakhstan commenced in 2004; border delimitation of 130 km of border with Kyrgyzstan is hampered by serious disputes around enclaves and other areas

Refugees and internally displaced persons:

refugees (country of origin): 39,202 (Tajikistan); 1,060 (Afghanistan)

IDPs: 3,400 (forced population transfers by government from villages near Tajikistan border) (2007)

Trafficking in persons:

current situation: Uzbekistan is a source country for women and girls trafficked to Kazakhstan, Russia, Middle East, and Asia for the purpose of commercial sexual exploitation; men are trafficked to Kazakhstan and Russia for purposes of forced labor in the construction, cotton, and tobacco industries; men and women are also trafficked internally for the purposes of domestic servitude, forced labor in the agricultural and construction industries, and for commercial sexual exploitation

tier rating: Tier 2 Watch List - Uzbekistan is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat severe forms of trafficking in 2007; the government did not amend its criminal code to increase penalties for convicted traffickers; in March

2008, Uzbekistan adopted ILO Conventions on minimum age of employment and on the elimination of the worst forms of child labor and is working with the ILO on implementation; the government also demonstrated its increasing commitment to combat trafficking in March 2008 by adopting a comprehensive anti-trafficking law; Uzbekistan has not ratified the 2000 UN TIP Protocol (2008)

Illicit drugs:

transit country for Afghan narcotics bound for Russian and, to a lesser extent, Western European markets; limited illicit cultivation of cannabis and small amounts of opium poppy for domestic consumption; poppy cultivation almost wiped out by government crop eradication program; transit point for heroin precursor chemicals bound for Afghanistan

Introduction ::

Background:

Multiple waves of colonizers, each speaking a distinct language, migrated to the New Hebrides in the millennia preceding European exploration in the 18th century. This settlement pattern accounts for the complex linguistic diversity found on the archipelago to this day. The British and French, who settled the New Hebrides in the 19th century, agreed in 1906 to an Anglo-French Condominium, which administered the islands until independence in 1980, when the new name of Vanuatu was adopted.

Flag description:

two equal horizontal bands of red (top) and green with a black isosceles triangle (based on the hoist side) all separated by a black-edged yellow stripe in the shape of a horizontal Y (the two points of the Y face the hoist side and enclose the triangle); centered in the triangle is a boar's tusk encircling two crossed namele fern fronds, all in yellow; red represents the blood of boars and men, green the richness of the islands, and black the ni-Vanuatu people; the yellow Y-shape - which reflects the pattern of the islands in the Pacific Ocean - symbolizes the light of the Gospel spreading through the islands; the

boar's tusk is a symbol of prosperity frequently worn as a pendant on the islands; the fern fronds represent peace

National anthem:

name: "Yumi, Yumi, Yumi" (We, We, We)

lyrics/music: Francois Vincent AYSSAV

note: adopted 1980, the anthem is written in Bislama, a Creole language that mixes Pidgin English and French

Economy ::

Economy - overview:

This South Pacific island economy is based primarily on small-scale agriculture, which provides a living for about two-thirds of the population. Fishing, offshore financial services, and tourism, with nearly 197,000 visitors in 2008, are other mainstays of the economy. Mineral deposits are negligible; the country has no known petroleum deposits. A small light industry sector caters to the local market. Tax revenues come mainly from import duties. Economic development is hindered by dependence on relatively few commodity exports, vulnerability to natural disasters, and long distances from main markets and between constituent islands. In response to foreign concerns, the government has promised to tighten regulation of its offshore financial center. In mid-2002, the government stepped up efforts to boost tourism through improved air connections, resort development, and cruise ship facilities. Agriculture, especially livestock farming, is a second target for growth. Australia and New Zealand are the main suppliers of tourists and foreign aid.

Venezuela

Introduction ::

Background:

Venezuela was one of three countries that emerged from the collapse of Gran Colombia in 1830 (the others being Ecuador and New Granada, which became Colombia). For most of the first half of the 20th century, Venezuela was ruled by generally benevolent military strongmen, who promoted the oil industry and allowed for some social reforms. Democratically elected governments have held sway since 1959. Hugo CHAVEZ, president since 1999, seeks to implement

his "21st Century Socialism," which purports to alleviate social ills while at the same time attacking capitalist globalization and existing democratic institutions. Current concerns include: a weakening of democratic institutions, political polarization, a politicized military, drug-related violence along the Colombian border, overdependence on the petroleum industry with its price fluctuations, and irresponsible mining operations that are endangering the rain forest and indigenous peoples.

Flag description:

three equal horizontal bands of yellow (top), blue, and red with the coat of arms on the hoist side of the yellow band and an arc of eight white five-pointed stars centered in the blue band; the flag retains the three equal horizontal bands and three main colors of the banner of Gran Colombia, the South American republic that broke up in 1830; yellow is interpreted as standing for the riches of the land, blue for the courage of its people, and red for the blood shed in attaining independence; the seven stars on the original flag represented the seven provinces in Venezuela that united in the war of independence; in 2006, President Hugo CHAVEZ ordered an eighth star added to the star arc - a decision that sparked much controversy

National anthem:

name: "Gloria al bravo pueblo" (Glory to the Brave Nation)

lyrics/music: Vicente SALIAS/Juan Jose LANDAETA

note: adopted 1881; the lyrics were written in 1810, the music some years later; both SALIAS and LANDAETA were executed in 1814 during Venezuela's struggle for independence

Economy ::

Economy - overview:

Venezuela remains highly dependent on oil revenues, which account for roughly 95% of export earnings, about 55% of the federal budget revenues, and around 30% of GDP. A nationwide strike between December 2002 and February 2003 had far-reaching economic consequences - real GDP declined by around 9% in 2002 and 8% in 2003 - but economic output since then has recovered strongly. Fueled by high oil prices, record government spending helped to boost GDP by about 10% in 2006, 8% in 2007, and nearly 5% in 2008, before a sharp drop in oil prices caused a contraction in 2009-10. This spending, combined with recent minimum wage hikes and improved access to domestic credit, has created a consumption boom but has come at the cost of higher inflation - roughly 32% in 2008, and slowing only slightly to 30% in 2010, despite the lengthy downturn. Imports also jumped significantly before the recession of 2009. President Hugo CHAVEZ's continued efforts to increase the government's control of the economy by nationalizing firms in the agribusiness, financial, construction, oil, and steel sectors have hurt the private investment environment, reduced productive capacity, and slowed non-petroleum exports. In the first half of 2010 Venezuela faced the prospect of lengthy nationwide blackouts when its main hydroelectric power plant - which provides more than 35% of the country's electricity - nearly shut down. In January, 2010, CHAVEZ announced a dual exchange rate system for the bolivar and closed the unofficial foreign exchange market - the "parallel" market - in an effort to stem inflation and slow the currency's depreciation. The foreign exchange system offers a 2.6 bolivar per dollar rate for imports of essentials, including food, medicine, and industrial machinery, and a 4.3 bolivar per dollar rate for imports of other products, including cars and telephones.

Transnational Issues ::

Disputes - international:

claims all of the area west of the Essequibo River in Guyana, preventing any discussion of a maritime boundary; Guyana has expressed its intention to join Barbados in asserting claims before the United Nations Convention on the Law of the Sea (UNCLOS) that Trinidad and Tobago's maritime boundary with Venezuela extends into their waters; dispute with Colombia over maritime boundary and Venezuelan-administered Los Monjes islands near the Gulf of

Venezuela; Colombian-organized illegal narcotics and paramilitary activities penetrate Venezuela's shared border region; in 2006, an estimated 139,000 Colombians sought protection in 150 communities along the border in Venezuela; US, France, and the Netherlands recognize Venezuela's granting full effect to Aves Island, thereby claiming a Venezuelan EEZ/continental shelf extending over a large portion of the eastern Caribbean Sea; Dominica, Saint Kitts and Nevis, Saint Lucia, and Saint Vincent and the Grenadines protest Venezuela's full effect claim

Trafficking in persons:

current situation: Venezuela is a source, transit, and destination country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; Venezuelan women and girls are trafficked within the country for sexual exploitation, lured from the nation's interior to urban and tourist areas; child prostitution in urban areas and child sex tourism in resort destinations appear to be growing; Venezuelan women and girls are trafficked for commercial sexual exploitation to Western Europe, Mexico, and Caribbean destinations

tier rating: Tier 2 Watch List - Venezuela is placed on the Tier 2 Watch List, up from Tier 3, as it showed greater resolve to address trafficking through law enforcement measures and prevention efforts in 2007, although stringent punishment of offenders and victim assistance remain lacking (2008)

Illicit drugs:

small-scale illicit producer of opium and coca for the processing of opiates and coca derivatives; however, large quantities of cocaine, heroin, and marijuana transit the country from Colombia bound for US and Europe; significant narcotics-related money-laundering activity, especially along the border with Colombia and on Margarita Island; active eradication program primarily targeting opium; increasing signs of drug-related activities by Colombian insurgents on border

Introduction ::

Background:

The conquest of Vietnam by France began in 1858 and was completed by 1884. It became part of French Indochina in 1887. Vietnam declared independence after World War II, but France continued to rule until its 1954 defeat by Communist forces under Ho Chi MINH. Under the Geneva Accords of 1954, Vietnam was divided into the Communist North and anti-Communist South. US economic and military aid to South Vietnam grew through the 1960s in an attempt to bolster the government, but US armed forces were withdrawn following a cease-fire agreement in 1973. Two years later, North Vietnamese forces overran the South reuniting the country under Communist rule. Despite the return of peace, for over a decade the country experienced little economic growth because of conservative leadership policies, the persecution and mass exodus of individuals - many of them successful South Vietnamese merchants - and growing international isolation. However, since the enactment of Vietnam's "doi moi" (renovation) policy in 1986, Vietnamese authorities have committed to increased economic liberalization and enacted structural reforms needed to modernize the economy and to produce more competitive, export-driven industries. The Communist leaders, however, maintain control on political expression and have resisted outside calls to improve human rights. The country continues to experience small-scale protests from various groups, the vast majority connected to land-use issues, calls for increased political space and the lack of equitable mechanisms for resolving disputes. Various ethnic minorities, such as the Montagnards of the Central Highlands and the Khmer Krom in the southern delta region, have also held protests.

Economy ::

Economy - overview:

Vietnam is a densely-populated developing country that in the last 30 years has had to recover from the ravages of war, the loss of financial support from the old Soviet Bloc, and the rigidities of a centrally-planned economy. Vietnamese authorities have reaffirmed their commitment to economic liberalization and international integration. They have moved to implement the structural reforms needed to modernize the economy and to produce more competitive export-driven industries. Vietnam joined the WTO in January 2007 following more than a decade-long negotiation process. WTO membership has provided Vietnam an anchor to the global market and reinforced the domestic economic reform process. Agriculture's share of economic output has continued to shrink from about 25% in 2000 to about 21% in 2009. Deep poverty has declined significantly and Vietnam is working to create jobs to meet the challenge of a labor force that is

growing by more than one million people every year. The global recession has hurt Vietnam's export-oriented economy with GDP growing less than the 7% per annum average achieved during the last decade. In 2009 exports fell nearly 10% year-on-year, prompting the government to consider adjustments to tariffs to limit the trade deficit. The government has used stimulus spending, including a subsidized lending program, to help the economy through the global financial crisis. Vietnam's managed currency, the dong, faced downward pressure during the recession and the government devalued it by nearly 7% in December 2009. Foreign donors pledged \$8 billion in new development assistance for 2010. Export growth resumed in 2010, driving GDP upward. However, Hanoi has struggled to control one of the region's highest inflation rates, which stands at 11.1% with interest hikes and multiple devaluations of the dong. Vietnam's economy faces higher lending rates, additional IMF scrutiny, domestic inflationary pressures, and an underperforming stock market.

Virgin Islands

>

Introduction ::

Background:

During the 17th century, the archipelago was divided into two territorial units, one English and the other Danish. Sugarcane, produced by slave labor, drove the islands' economy during the 18th and early 19th centuries. In 1917, the US purchased the Danish portion, which had been in economic decline since the abolition of slavery in 1848.

Economy ::

Economy - overview:

Tourism is the primary economic activity, accounting for 80% of GDP and employment. The islands hosted 2.4 million visitors in 2008. The manufacturing sector consists of petroleum refining, rum distilling, textiles, electronics, pharmaceuticals, and watch assembly. One of the world's largest petroleum refineries is at Saint Croix. The agricultural

sector is small, with most food being imported. International business and financial services are small but growing components of the economy. The islands are vulnerable to substantial damage from storms. The government is working to improve fiscal discipline, to support construction projects in the private sector, to expand tourist facilities, to reduce crime, and to protect the environment.

Wake Island

>

Introduction ::

Background:

The US annexed Wake Island in 1899 for a cable station. An important air and naval base was constructed in 1940-41. In December 1941, the island was captured by the Japanese and held until the end of World War II. In subsequent years, Wake was developed as a stopover and refueling site for military and commercial aircraft transiting the Pacific. Since 1974, the island's airstrip has been used by the US military, as well as for emergency landings. Although operations on

the island were suspended and all personnel evacuated in August 2006 with the approach of super typhoon IOKE (category 5), damage was comparatively minor. A US Air Force repair team restored full capability to the airfield and facilities, which remains a vital strategic link in the Pacific region.

Wallis and Futuna

>

Introduction ::

Background:

The Futuna island group was discovered by the Dutch in 1616 and Wallis by the British in 1767, but it was the French who declared a protectorate over the islands in 1842. In 1959, the inhabitants of the islands voted to become a French overseas territory.

Introduction ::

Background:

The September 1993 Israel-PLO Declaration of Principles on Interim Self-Government Arrangements provided for a transitional period of Palestinian self-rule in the West Bank and the Gaza Strip. Under a series of agreements signed between May 1994 and September 1999, Israel transferred to the Palestinian Authority (PA) security and civilian responsibility for many Palestinian-populated areas of the West Bank and Gaza Strip. Negotiations to determine the permanent status of the West Bank and Gaza Strip stalled following the outbreak of an intifada in September 2000. In April 2003, the Quartet (US, EU, UN, and Russia) presented a roadmap to a final settlement of the conflict by 2005 based on reciprocal steps by the two parties leading to two states, Israel and a democratic Palestine. Following Palestinian leader Yasir ARAFAT's death in late 2004, Mahmud ABBAS was elected PA president in January 2005. A month later, Israel and the PA agreed to the Sharm el-Sheikh Commitments in an effort to move the peace process forward. In September 2005, Israel unilaterally withdrew all its settlers and soldiers and dismantled its military facilities in the Gaza Strip and withdrew settlers and redeployed soldiers from four small northern West Bank settlements. Nonetheless, Israel still controls maritime, airspace, and most access to the Gaza Strip. In January 2006, the Islamic Resistance Movement, HAMAS, won control of the Palestinian Legislative Council (PLC). HAMAS took control of the PA government in March 2006, but President ABBAS had little success negotiating with HAMAS to present a political platform acceptable to the international community so as to lift economic sanctions on Palestinians. Violent clashes between Fatah and HAMAS supporters in the Gaza Strip in 2006 and early 2007 resulted in numerous Palestinian deaths and injuries. In February 2007, ABBAS and HAMAS Political Bureau Chief MISHAL signed the Mecca Agreement in Saudi Arabia that resulted in the formation of a Palestinian National Unity Government (NUG) headed by HAMAS member Ismail HANIYA. However, fighting continued in the Gaza Strip, and in June 2007, HAMAS militants succeeded in a violent takeover of all military and governmental institutions in the Gaza Strip. ABBAS dismissed the NUG and through a series of presidential decrees formed a PA government in the West Bank led by independent Salam FAYYAD. HAMAS rejected the NUG's dismissal, and despite multiple rounds of Egyptian-brokered reconciliation negotiations, the two groups have failed to bridge their differences. The status quo remains with HAMAS in control of the Gaza Strip and ABBAS and the Fatah-dominated PA governing the West Bank. FAYYAD and his PA government continue to implement a series of security and economic

reforms to improve conditions in the West Bank. ABBAS has said he will not resume negotiations with current Prime Minister NETANYAHU until Israel halts all settlement activity in the West Bank and Jerusalem.

Economy ::

Economy - overview:

The West Bank - the larger of the two areas comprising the Palestinian territories - experienced a high single-digit economic growth rate in 2010 as a result of inflows of donor aid, the Palestinian Authority's (PA) implementation of economic and security reforms, and the easing of some movement and access restrictions by the Israeli Government. Nevertheless, overall standard-of-living measures remain near levels seen prior to the start of the second intifada in 2000. The almost decade-long downturn largely has been a result of Israeli closure policies - a steady increase in movement and access restrictions across the West Bank in response to Israeli security concerns which have disrupted labor and trade flows, industrial capacity, and basic commerce, both external and internal. Since 2008, the PA under President Mahmoud ABBAS and Prime Minister Salam FAYYAD has implemented a largely successful campaign of institutional reforms that has contributed to increased security and economic performance, supported by more than \$3 billion in direct foreign donor assistance to the PA's budget since 2007. An easing of some Israeli restrictions on West Bank movement and access since 2008 also has contributed to an uptick in retail activity in larger cities. The biggest impediments to economic improvements in the West Bank remain Palestinians' lack of access to land and resources in Israeli-controlled areas, import and

export restrictions, and a high-cost capital structure. Absent robust private sector growth, the PA will continue to rely heavily on donor aid for its budgetary needs.

Western Sahara

Introduction ::

Background:

Morocco annexed the northern two-thirds of Western Sahara (formerly Spanish Sahara) in 1976 and claimed the rest of the territory in 1979, following Mauritania's withdrawal. A guerrilla war with the Polisario Front contesting Morocco's sovereignty ended in a 1991 UN-brokered cease-fire; a UN-organized referendum on the territory's final status has been repeatedly postponed. The UN since 2007 has sponsored intermittent talks between representatives of the Government of

Morocco and the Polisario Front to negotiate the status of Western Sahara. Morocco has put forward an autonomy proposal for the territory, which would allow for some local administration while maintaining Moroccan sovereignty. The Polisario, with Algeria's support, demands a popular referendum that includes the option of independence.

Economy ::

Economy - overview:

Western Sahara has a small market-based economy whose main industries are fishing, phosphate mining, and pastoral nomadism. The territory's arid desert climate makes sedentary agriculture difficult, and Western Sahara imports much of its food. The Moroccan Government administers Western Sahara's economy and is a source of employment, infrastructure development, and social spending in the territory. Western Sahara's unresolved legal status makes the exploitation of its natural resources a contentious issue between Morocco and the Polisario. Morocco and the EU in July 2006 signed a four-year agreement allowing European vessels to fish off the coast of Morocco, including the disputed waters off the coast of Western Sahara. Oil has never been found in Western Sahara in commercially significant quantities, but Morocco and the Polisario have quarreled over who has the right to authorize and benefit from oil exploration in the territory. Western Sahara's main long-term economic challenge is the development of a more diverse set of industries capable of providing greater employment and income to the territory.

Yemen

Introduction ::

Background:

North Yemen became independent of the Ottoman Empire in 1918. The British, who had set up a protectorate area around the southern port of Aden in the 19th century, withdrew in 1967 from what became South Yemen. Three years later, the southern government adopted a Marxist orientation. The massive exodus of hundreds of thousands of Yemenis from the south to the north contributed to two decades of hostility between the states. The two countries were

formally unified as the Republic of Yemen in 1990. A southern secessionist movement in 1994 was quickly subdued. In 2000, Saudi Arabia and Yemen agreed to a delimitation of their border.

Economy ::

Economy - overview:

Yemen is a low income country that is highly dependent on declining oil resources for revenue. Petroleum accounts for roughly 25% of GDP

and 70% of government revenue. Yemen has tried to counter the effects of its declining oil resources by diversifying its economy through an economic reform program initiated in 2006 that is designed to bolster non-oil sectors of the economy and foreign investment. In October 2009, Yemen exported its first liquefied natural gas as part of this diversification effort. In January 2010, the international community established the Friends of Yemen group that aims to support Yemen's efforts towards economic and political reform, and in August 2010 the IMF approved a three-year \$370 million program to further this effort. Despite these ambitious endeavors, Yemen continues to face difficult long term challenges, including declining water resources and a high population growth rate.

Introduction ::

Background:

The territory of Northern Rhodesia was administered by the [British] South Africa Company from 1891 until it was taken over by the UK in 1923. During the 1920s and 1930s, advances in mining spurred development and immigration. The name was changed to Zambia upon independence in 1964. In the 1980s and 1990s, declining copper prices and a prolonged drought hurt the economy. Elections in 1991 brought an end to one-party rule, but the subsequent vote in 1996 saw

blatant harassment of opposition parties. The election in 2001 was marked by administrative problems with three parties filing a legal petition challenging the election of ruling party candidate Levy MWANAWASA. The new president launched an anticorruption investigation in 2002 to probe high-level corruption during the previous administration. In 2006-07, this task force successfully prosecuted four cases, including a landmark civil case in the UK in which former President CHILUBA and numerous others were found liable for USD 41 million. MWANAWASA was reelected in 2006 in an election that was deemed free and fair. Upon his abrupt death in August 2008, he was succeeded by his Vice President Rupiah BANDA, who subsequently won a special presidential election in October 2008.

Economy ::

Economy - overview:

Zambia's economy has experienced strong growth in recent years, with real GDP growth in 2005-08 about 6% per year. Privatization of government-owned copper mines in the 1990s relieved the government from covering mammoth losses generated by the industry and greatly improved the chances for copper mining to return to profitability and spur economic growth. Copper output has increased steadily since 2004, due to higher copper prices and foreign investment. In 2005, Zambia qualified for debt relief under the Highly Indebted Poor Country Initiative, consisting of approximately USD 6 billion in debt relief. Poverty remains a significant problem in Zambia, despite a stronger economy. Declining world commodity prices and demand slowed GDP growth in 2008, but a sharp rebound in copper prices and a bumper maize crop helped Zambia recover. Lack of economic diversity subjects Zambia to fluctuations in copper prices and in the weather.

Transnational Issues ::

Disputes - international:

in 2004, Zimbabwe dropped objections to plans between Botswana and Zambia to build a bridge over the Zambezi River, thereby de facto recognizing a short, but not clearly delimited, Botswana-Zambia boundary in the river

Refugees and internally displaced persons:

refugees (country of origin): 42,565 (Angola); 60,874 (Democratic Republic of the Congo); 4,100 (Rwanda) (2007)

Illicit drugs:

transshipment point for moderate amounts of methaqualone, small amounts of heroin, and cocaine bound for southern Africa and possibly Europe; a poorly developed financial infrastructure coupled with a government commitment to combating money laundering make

it an unattractive venue for money launderers; major consumer of cannabis

Introduction ::

Background:

The UK annexed Southern Rhodesia from the [British] South Africa Company in 1923. A 1961 constitution was formulated that favored whites in power. In 1965 the government unilaterally declared its independence, but the UK did not recognize the act and demanded more complete voting rights for the black African majority in the country (then called Rhodesia). UN sanctions and a guerrilla uprising

finally led to free elections in 1979 and independence (as Zimbabwe) in 1980. Robert MUGABE, the nation's first prime minister, has been the country's only ruler (as president since 1987) and has dominated the country's political system since independence. His chaotic land redistribution campaign, which began in 2000, caused an exodus of white farmers, crippled the economy, and ushered in widespread shortages of basic commodities. Ignoring international condemnation, MUGABE rigged the 2002 presidential election to ensure his reelection. The ruling ZANU-PF party used fraud and intimidation to win a two-thirds majority in the March 2005 parliamentary election, allowing it to amend the constitution at will and recreate the Senate, which had been abolished in the late 1980s. In April 2005, Harare embarked on Operation Restore Order, ostensibly an urban rationalization program, which resulted in the destruction of the homes or businesses of 700,000 mostly poor supporters of the opposition. President MUGABE in June 2007 instituted price controls on all basic commodities causing panic buying and leaving store shelves empty for months. General elections held in March 2008 contained irregularities but still amounted to a censure of the ZANU-PF-led government with the opposition winning a majority of seats in parliament. MDC opposition leader Morgan TSVANGIRAI won the most votes in the presidential polls, but not enough to win outright. In the lead up to a run-off election in late June 2008, considerable violence enacted against opposition party members led to the withdrawal of TSVANGIRAI from the ballot. Extensive evidence of vote tampering and ballot-box stuffing resulted in international condemnation of the process. Difficult negotiations over a power-sharing government, in which MUGABE remained president and TSVANGIRAI became prime minister, were finally settled in February 2009, although the leaders have yet failed to agree upon many key outstanding governmental issues.

Economy ::

Economy - overview:

The government of Zimbabwe faces a wide variety of difficult economic problems. Its 1998-2002 involvement in the war in the Democratic Republic of the Congo drained hundreds of millions of dollars from the economy. The government's land reform program, characterized by chaos and violence, has badly damaged the commercial farming sector, the traditional source of exports and foreign exchange and the provider of 400,000 jobs, turning Zimbabwe into a net importer of food products. The EU and the US provide food aid on humanitarian grounds. Until early 2009, the Reserve Bank of Zimbabwe routinely printed money to fund the budget deficit, causing hyperinflation. The power-sharing government formed in February 2009 has led to some economic improvements, including the cessation of hyperinflation by eliminating the use of the Zimbabwe dollar and removing price controls. The economy is registering its first growth in a decade, but will be reliant on further political improvement for greater growth.

IDPs: 569,685 (MUGABE-led political violence, human rights violations, land reform, and economic collapse) (2007)

Trafficking in persons:

current situation: Zimbabwe is a source, transit, and destination country for men, women, and children trafficked for the purposes of forced labor and sexual exploitation; large scale migration of Zimbabweans to surrounding countries - as they flee a progressively more desperate situation at home - has increased; rural Zimbabwean men, women, and children are trafficked internally to farms for agricultural labor and domestic servitude and to cities for domestic labor and commercial sexual exploitation; NGOs believe internal trafficking increased during the year, largely due to the closure of schools, worsening political violence, and a faltering economy; young men and boys are trafficked to South Africa for farm work, often laboring for months in South Africa without pay before "employers" have them arrested and deported as illegal immigrants; young women and girls are lured abroad with false employment offers that result in involuntary domestic servitude or commercial sexual exploitation; men, women, and children from neighboring states are trafficked through Zimbabwe en route to South Africa

tier rating: Tier 3 - the Government of Zimbabwe does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government made minimal progress in combating trafficking in 2008, and members of its military and the former ruling party's youth militias perpetrated acts of trafficking on local populations; anti-trafficking efforts were further weakened as it failed to address Zimbabwe's economic and social problems during the reporting period, thus increasing the population's vulnerability to trafficking within and outside of the country (2009)

Illicit drugs:

Taiwan

>

Introduction ::

Background:

In 1895, military defeat forced China to cede Taiwan to Japan. Taiwan reverted to Chinese control after World War II. Following the Communist victory on the mainland in 1949, 2 million Nationalists fled to Taiwan and established a government using the 1947 constitution drawn up for all of China. Over the next five decades, the ruling authorities gradually democratized and incorporated the local population within the governing structure. In 2000, Taiwan

underwent its first peaceful transfer of power from the Nationalist to the Democratic Progressive Party. Throughout this period, the island prospered and became one of East Asia's economic "Tigers." The dominant political issues continue to be the relationship between Taiwan and China - specifically the question of Taiwan's eventual status - as well as domestic political and economic reform.

Flag description:

red field with a dark blue rectangle in the upper hoist-side corner bearing a white sun with 12 triangular rays; the blue and white design of the canton (symbolizing the sun of progress) dates to 1895; it was later adopted as the flag of the Kuomintang Party; blue signifies liberty, justice, and democracy; red stands for fraternity, sacrifice, and nationalism, white represents equality, frankness, and the people's livelihood; the 12 rays of the sun are those of the months and the twelve traditional Chinese hours (each ray equals two hours)

note: somewhat resembles the flag of Burma

National anthem:

name: "Zhonghua Minguo guoge" (National Anthem of the Republic of China)

lyrics/music: HU Han-min, TAI Chi-t'ao, and LIAO Chung-k'ai/CHENG Mao-Yun

note: adopted 1930; the anthem is also the song of the Kuomintang Party; it is informally known as "San Min Cau I" (Three Principles of the People); because of political pressure from China, "Guo qi ee" (National Banner Song) is used at international events rather than the official anthem of Taiwan; the "National Banner Song" has gained popularity in Taiwan and is commonly used during flag raisings

Economy ::

Economy - overview:

Taiwan has a dynamic capitalist economy with gradually decreasing government guidance of investment and foreign trade. In keeping with this trend, some large, state-owned banks and industrial firms have been privatized. Exports, led by electronics and machinery, generate about 70% of Taiwan's GDP growth, and have provided the primary impetus for economic development. This heavy dependence on exports makes the economy vulnerable to downturns in world demand. In 2009, Taiwan's GDP fell by 1.9%, due primarily to a 20% year-on-year decline in exports. GDP grew more than 8% in 2010, as exports

returned to the level of previous years. Taiwan's diplomatic isolation, low birth rate, and rapidly aging population are major long-term challenges. Free trade agreements have proliferated in East Asia over the past several years, but so far Taiwan has been excluded from this greater economic integration, largely for reasons of diplomacy. Taiwan's birth rate of only 1.2 child per woman is among the lowest in the world, raising the prospect of future labor shortages, falling domestic demand, and declining tax revenues. Taiwan's population is aging quickly, with the number of people over 65 accounting for 10.8% of the island's total population as of the end of 2009. The island runs a large trade surplus, and its foreign reserves are the world's fourth largest, behind China, Japan, and Russia. Since President MA Ying-jeou took office in May 2008, cross-strait economic ties have increased significantly. Since 2005 China has overtaken the US to become Taiwan's second-largest source of imports after Japan. China is also the island's number one destination for foreign direct investment. Taipei has focused much of its economic recovery effort on improving cross-strait economic integration. Three financial memorandums of understanding, covering banking, securities, and insurance, took effect in mid-January 2010, opening the island to greater investments from the Mainland's financial firms and institutional investors, and providing new opportunities for Taiwan financial firms to operate in China. Taiwan and the mainland in June 2010 signed the landmark Economic Cooperation Framework Agreement (ECFA), an agreement similar to a free-trade agreement deal that will increase cross-strait economic ties by lowering tariffs on a number of goods. Taiwan's government has said that the ECFA will serve as a stepping stone toward trade pacts with other regional partners and announced the beginning of negotiations on such an agreement with Singapore in August.

involved in complex dispute with Brunei, China, Malaysia, the Philippines, and Vietnam over the Spratly Islands, and with China and the Philippines over Scarborough Reef; the 2002 "Declaration on the Conduct of Parties in the South China Sea" has eased tensions but falls short of a legally binding "code of conduct" desired by several of the disputants; Paracel Islands are occupied by China, but claimed by Taiwan and Vietnam; in 2003, China and Taiwan became more vocal in rejecting both Japan's claims to the uninhabited islands of the Senkaku-shoto (Diaoyu Tai) and Japan's unilaterally declared exclusive economic zone in the East China Sea where all parties engage in hydrocarbon prospecting

Illicit drugs:

regional transit point for heroin, methamphetamine, and precursor chemicals; transshipment point for drugs to Japan; major problem with domestic consumption of methamphetamine and heroin; rising problems with use of ketamine and club drugs

European Union

(map)

Introduction ::

Preliminary statement:

The evolution of the European Union (EU) from a regional economic agreement among six neighboring states in 1951 to today's supranational organization of 27 countries across the European continent stands as an unprecedented phenomenon in the annals of history. Dynastic unions for territorial consolidation were long the norm in Europe. On a few occasions even country-level unions were arranged - the Polish-Lithuanian Commonwealth and the Austro-Hungarian Empire were examples - but for such a large number of nation-states to cede some of their sovereignty to an overarching entity is truly unique.

Although the EU is not a federation in the strict sense, it is far more than a free-trade association such as ASEAN, NAFTA, or Mercosur, and it has many of the attributes associated with independent nations: its own flag, anthem, founding date, and currency, as well as an incipient common foreign and security policy in its dealings with other nations.

In the future, many of these nation-like characteristics are likely to be expanded. Thus, inclusion of basic intelligence on the EU has been deemed appropriate as a new, separate entity in The World Factbook. However, because of the EU's special status, this description is placed after the regular country entries.

Background:

Following the two devastating World Wars in the first half of the 20th century, a number of European leaders in the late 1940s became convinced that the only way to establish a lasting peace was to unite the two chief belligerent nations - France and Germany - both economically and politically. In 1950, the French Foreign Minister Robert SCHUMAN proposed an eventual union of all Europe, the first step of which would be the integration of the coal and steel industries of Western Europe. The following year the European Coal and Steel Community (ECSC) was set up when six members, Belgium, France, West Germany, Italy, Luxembourg, and the Netherlands, signed the Treaty of Paris.

The ECSC was so successful that within a few years the decision was made to integrate other parts of the countries' economies. In 1957, the Treaties of Rome created the European Economic Community (EEC) and the European Atomic Energy Community (Euratom), and the six member states undertook to eliminate trade barriers among themselves by forming a common market. In 1967, the institutions of all three communities were formally merged into the European

Community (EC), creating a single Commission, a single Council of Ministers, and the European Parliament. Members of the European Parliament were initially selected by national parliaments, but in 1979 the first direct elections were undertaken and they have been held every five years since.

In 1973, the first enlargement of the EC took place with the addition of Denmark, Ireland, and the United Kingdom. The 1980s saw further membership expansion with Greece joining in 1981 and Spain and Portugal in 1986. The 1992 Treaty of Maastricht laid the basis for further forms of cooperation in foreign and defense policy, in judicial and internal affairs, and in the creation of an economic and monetary union - including a common currency. This further integration created the European Union (EU). In 1995, Austria, Finland, and Sweden joined the EU, raising the membership total to 15.

A new currency, the euro, was launched in world money markets on 1 January 1999; it became the unit of exchange for all of the EU states except the United Kingdom, Sweden, and Denmark. In 2002, citizens of the 12 euro-area countries (the European Monetary Union or EMU) began using the euro banknotes and coins. Ten new countries joined the EU in 2004 - Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, and Slovenia - and in 2007 Bulgaria and Romania joined, bringing the current membership to 27. In order to ensure that the EU can continue to function efficiently with an expanded membership, the Treaty of Nice (in force as of 1 February 2003) set forth rules streamlining the size and procedures of EU institutions. An effort to establish an EU constitution, begun in October 2004, failed to attain unanimous ratification. A new effort, undertaken in June 2007, created an Intergovernmental Conference to formulate a political agreement - initially known as the Reform Treaty but subsequently referred to as the Treaty of Lisbon - which would serve as a constitution. Unlike the constitution, however, the Treaty of Lisbon sought to amend existing treaties rather than replace them. In October 2009, an Irish referendum approved the Treaty (overturning a previous rejection) and cleared the way for an ultimate unanimous endorsement - the Czech Republic signed on soon after. Treaty implementation began on 1 December 2009. In 2010, the prospect of a Greek default on its euro-denominated debt created severe strains within the EMU and raised the question of whether a member country might be removed.

elections: the president of the European Commission designated by member governments and confirmed by the European Parliament; working from member state recommendations, the Commission president then assembles a "college" of Commission members; the European Parliament confirms the entire Commission for a five-year term; the next confirmation process will likely be held in January 2015

note: the European Council brings together heads of state and government and the president of the European Commission and meets at least four times a year; its aim is to provide the impetus for the major political issues relating to European integration and to issue general policy guidelines; leaders of the EU member states appointed then Belgian Prime Minister Herman VAN ROMPUY to be the first full-time president of the European Council in November 2009; he took office on 1 December 2009 and will serve a two-and-one-half-year term, renewable once; his core responsibilities include chairing the four summits each year and providing continuity beyond the rotating, six-month presidencies of the Council of the EU

Legislative branch:

two legislative bodies consisting of the Council of the European Union (27 member-state ministers having 345 votes; the number of votes is roughly proportional to member-states' population) and the European Parliament (736 seats; seats allocated among member states in proportion to population; members elected by direct universal suffrage for a five-year term); note - the Council is the main decision-making body of the EU; leaders of the EU member states appointed UK Baroness Catherine Ashton to be the first High Representative of the Union for Foreign Affairs and Security Policy; Ashton took office on 1 December 2009; her concurrent appointment as Vice President of the European Commission - both of which are subject to confirmation by the European Parliament - endows her position with the policymaking influence of the Council of the EU and the budgetary influence of the European Commission

elections: last held on 4-7 June 2009 (next to be held in June 2014)

election results: percent of vote - EPP 36%, S&D 25%, ALDE 11.4%, Greens/EFA 7.5%, ECR 7.3%, GUE/NGL 4.8%, EFD 4.3%, independents 3.7%; seats by party - EPP 265, S&D 184, ALDE 84, Greens/EFA 55, ECR 54, GUE/NGL 35, EFD 32, independents 27

Judicial branch:

Court of Justice of the European Communities (ensures that the treaties are interpreted and applied uniformly throughout the EU; resolve constitutional issues among the EU institutions) - 27 justices (one from each member state) appointed for a six-year term; note - for the sake of efficiency, the court can sit with 13 justices known as the "Grand Chamber"; Court of First Instance - 27 justices appointed for a six-year term

Political parties and leaders:

Economy ::

Economy - overview:

Internally, the EU has abolished trade barriers, adopted a common currency, and is striving toward convergence of living standards. Internationally, the EU aims to bolster Europe's trade position and its political and economic power. Because of the great differences in per capita income among member states (from \$7,000 to \$78,000) and in national attitudes toward issues like inflation, debt, and foreign trade, the EU faces difficulties in devising and enforcing common policies. In the wake of the global economic crisis, the European Commission projected that the EU's economy would shrink by 4% in 2009 and 0.1% in 2010. The EU has recovered from the crisis faster than

expected, however, and the Commission estimates 2010 growth at 1.8%. Significant risks to growth nevertheless remain, including, high official debts and deficits, aging populations, over-regulation of non-financial businesses, and doubts about the sustainability of European Economic and Monetary Union (EMU). In June 2010, prompted by the Greek financial crisis, the EU and the IMF set up a \$1 trillion bailout fund to rescue any EMU member in danger of default, but it has not calmed market jitters that have diminished the value of the euro. Eleven established EU member states introduced the euro as their common currency on 1 January 1999 (Greece did so two years later), but the UK and Denmark have 'opt-outs' that allow them to keep their national currencies, and Sweden has not taken the steps needed to participate. Between 2004 and 2007, the EU admitted 12 countries that are, in general, less advanced economically than the other 15. Of the 12 most recent member states, only Slovenia (1 January 2007), Cyprus and Malta (1 January 2008), Slovakia (1 January 2009), and Estonia (1 January 2011) have adopted the euro; the remaining states other than the UK and Denmark are legally required to adopt the currency upon meeting EU's fiscal and monetary convergence criteria.

Military ::

Military - note:

the five-nation Eurocorps - created in 1992 by France, Germany, Belgium, Spain, and Luxembourg - has deployed troops and police on peacekeeping missions to Bosnia-Herzegovina, Macedonia, and the Democratic Republic of the Congo and assumed command of the ISAF in Afghanistan in August 2004; Eurocorps directly commands the 5,000-man Franco-German Brigade, the Multinational Command Support Brigade, and EUFOR in Bosnia and Herzegovina; in November 2004, the EU Council of Ministers formally committed to creating 13 1,500-man battle groups by the end of 2007, to respond to international crises on a rotating basis; 22 of the EU's 27 nations have agreed to supply troops; France, Italy, and the UK formed the first of three battle groups in 2005; Norway, Sweden, Estonia, and Finland established the Nordic Battle Group effective 1 January 2008; nine other groups are to be formed; a rapid-reaction naval EU Maritime Task Group was stood up in March 2007 (2007)

Transnational Issues ::

Disputes - international:

as a political union, the EU has no border disputes with neighboring countries, but Estonia has no land boundary agreements with Russia, Slovenia disputes its land and maritime boundaries with Croatia, and Spain has territorial and maritime disputes with Morocco and with the UK over Gibraltar; the EU has set up a Schengen area - consisting of 22 EU member states that have signed the convention implementing the Schengen agreements or "acquis" (1985 and 1990) on the free movement of persons and the harmonization of border controls in Europe; these agreements became incorporated into EU law with the implementation of the 1997 Treaty of Amsterdam on 1 May 1999; in addition, non-EU states Iceland and Norway (as part of the Nordic Union) have been included in the Schengen area since 1996 (full members in 2001), and Switzerland since 2008 bringing the total current membership to 25; the UK (since 2000) and Ireland (since 2002) take part in only some aspects of the Schengen area, especially with respect to police and criminal matters; nine of the 12 new member states that joined the EU since 2004 joined Schengen on 21 December 2007; of the three remaining EU states, Cyprus is expected to join by 2009, while Romania and Bulgaria continue to enhance

their border security systems

People

Population

This entry gives an estimate from the US Bureau of the Census based on statistics from population censuses, vital statistics registration systems, or sample surveys pertaining to the recent past and on assumptions about future trends. The total population presents one overall measure of the potential impact of the country on the world and within its region. Note: Starting with the 1993 *Factbook*, demographic estimates for some countries (mostly African) have explicitly taken into account the effects of the growing impact of the HIV/AIDS epidemic. These countries are currently: The Bahamas, Benin, Botswana, Brazil, Burkina Faso, Burma, Burundi, Cambodia, Cameroon, Central African Republic, Democratic Republic of the Congo, Republic of the Congo, Cote d'Ivoire, Ethiopia, Gabon, Ghana, Guyana, Haiti, Honduras, Kenya, Lesotho, Malawi, Mozambique, Namibia, Nigeria, Rwanda, South Africa, Swaziland, Tanzania, Thailand, Togo, Uganda, Zambia, and Zimbabwe.

Population growth

The average annual percent change in the population, resulting from a surplus (or deficit) of births over deaths and the balance of migrants entering and leaving a country. The rate may be positive or negative. The growth rate is a factor in determining how great a burden would be imposed on a country by the changing needs of its people for infrastructure (e.g., schools, hospitals, housing, roads), resources (e.g., food, water, electricity), and jobs. Rapid population growth can be seen as threatening by neighboring countries.

Birth rate

This entry gives the average annual number of births during a year per 1,000 persons in the population at midyear; also known as crude birth rate. The birth rate is usually the dominant factor in determining the rate of population growth. It depends on both the level of fertility and the age structure of the population.

Death rate

This entry gives the average annual number of deaths during a year per 1,000 population at midyear; also known as crude death rate. The death rate, while only a rough indicator of the mortality situation in a country, accurately indicates the current mortality impact on population growth. This indicator is significantly affected by age distribution, and most countries will eventually show a rise in the overall death rate, in spite of continued decline in mortality at all ages, as declining fertility results in an aging population.

Net migration rate

This entry includes the figure for the difference between the number of persons entering and leaving a country during the year per 1,000 persons (based on midyear population). An excess of persons entering the country is referred to as net immigration (e.g., 3.56 migrants/1,000 population); an excess of persons leaving the country as net emigration (e.g., -9.26 migrants/1,000 population). The net migration rate indicates the contribution of migration to the overall level of population change. The net migration rate does not distinguish between economic migrants, refugees, and other types of migrants nor does it distinguish between lawful migrants and undocumented migrants.

Life expectancy at birth

This entry contains the average number of years to be lived by a group of people born in the same year, if mortality at each age remains constant in the future. The entry includes *total population* as well as the *male* and *female* components. Life expectancy at birth is also a measure of overall quality of life in a country and summarizes the mortality at all ages. It can also be thought of as indicating the potential return on investment in human capital and is necessary for the calculation of various actuarial measures.

Total fertility rate

This entry gives a figure for the average number of children that would be born per woman if all women lived to the end of their childbearing years and bore children according to a given fertility rate at each age. The total fertility rate (TFR) is a more direct measure of the level of fertility than the crude birth rate, since it refers to births per woman. This indicator shows the potential for population change in the country. A rate of two children per woman is considered the replacement rate for a population, resulting in relative stability in terms of total numbers. Rates above two children indicate populations growing in size and whose median age is declining. Higher rates may also indicate difficulties for families, in some situations, to feed and educate their children and for women to enter the labor force. Rates below two children indicate populations decreasing in size and growing older. Global fertility rates are in general decline and this trend is most pronounced in industrialized countries, especially Western Europe, where populations are projected to decline dramatically over the next 50 years.

GDP (purchasing power parity)

This entry gives the gross domestic product (GDP) or value of all final goods and services produced within a nation in a given year. A nation's GDP at purchasing power parity (PPP) exchange rates is the sum value of all goods and services produced in the country valued at prices prevailing in the United States. This is the measure most economists prefer when looking at per-capita welfare and when comparing living conditions or use of resources across countries. The measure is difficult to compute, as a US dollar value has to be assigned to all goods and services in the country regardless of whether these goods and services have a direct equivalent in the United States (for example, the value of an ox-cart or non-US military equipment); as a result, PPP estimates for some countries are based on a small and sometimes different set of goods and services. In addition, many countries do not formally participate in the World Bank's PPP project that calculates these measures, so the resulting GDP estimates for these countries may lack precision. For many developing countries, PPP-based GDP measures are multiples of the official exchange rate (OER) measure. The differences between the OER- and PPP-denominated GDP values for most of the wealthy industrialized countries are generally much smaller.

Distribution of family income - Gini Index

This index measures the degree of inequality in the distribution of family income in a country. The index is calculated from the Lorenz curve, in which cumulative family income is plotted against the number of families arranged from the poorest to the richest. The index is the ratio of (a) the area between a country's Lorenz curve and the 45 degree helping line to (b) the entire triangular area under the 45 degree line. The more nearly equal a country's income distribution, the closer its Lorenz curve to the 45 degree line and the lower its Gini index, e.g., a Scandinavian country with an index of 25. The more unequal a country's income distribution, the farther its Lorenz curve from the 45 degree line and the higher its Gini index, e.g., a Sub-Saharan country with an index of 50. If income were distributed with perfect equality, the Lorenz curve would coincide with the 45 degree line and the index would be zero; if income were distributed with perfect inequality, the Lorenz curve would coincide with the horizontal axis and the right vertical axis and the index would be 100.

Investment (gross fixed)

This entry records total business spending on fixed assets, such as factories, machinery, equipment, dwellings, and inventories of raw materials, which provide the basis for future production. It is measured gross of the depreciation of the assets, i.e., it includes investment that merely replaces worn-out or scrapped capital.

Public debt

This entry records the cumulative total of all government borrowings less repayments that are denominated in a country's home currency. Public debt should not be confused with external debt, which reflects the foreign currency liabilities of both the private and public sector and must be financed out of foreign exchange earnings.

Oil - proved reserves

This entry is the stock of proved reserves of crude oil in barrels (bbl). Proved reserves are those quantities of petroleum which, by analysis of geological and engineering data, can be estimated with a high degree of confidence to be commercially recoverable from a given date forward, from known reservoirs and under current economic conditions.

Natural gas - proved reserves

This entry is the stock of proved reserves of natural gas in cubic meters (cu m). Proved reserves are those quantities of natural gas, which, by analysis of geological and engineering data, can be estimated with a high degree of confidence to be commercially recoverable from a given date forward, from known reservoirs and under current economic conditions.

Internet hosts

This entry lists the number of Internet hosts available within a country. An Internet host is a computer connected directly to the Internet; normally an Internet Service Provider's (ISP) computer is a host. Internet users may use either a hard-wired terminal, at an institution with a mainframe computer connected directly to the Internet, or may connect remotely by way of a modem via telephone line, cable, or satellite to the Internet Service Provider's host computer. The number of hosts is one indicator of the extent of Internet connectivity.

Airports

>

This entry gives the total number of airports or airfields recognizable from the air. The runway(s) may be paved (concrete or asphalt surfaces) or unpaved (grass, earth, sand, or gravel surfaces) and may include closed or abandoned installations. Airports or airfields that are no longer recognizable (overgrown, no facilities, etc.) are not included. Note that not all airports have accommodations for refueling, maintenance, or air traffic control.

Merchant marine

Merchant marine may be defined as all ships engaged in the carriage of goods; or all commercial vessels (as opposed to all nonmilitary ships), which excludes tugs, fishing vessels, offshore oil rigs, etc. This entry contains information in four fields - *total*, *ships by type*, *foreign-owned*, and *registered in other countries*. *Total* includes the number of ships (1,000 GRT or over), total DWT for those ships, and total GRT for those ships. DWT or dead weight tonnage is the total weight of cargo, plus bunkers, stores, etc., that a ship can carry when immersed to the appropriate load line. GRT or gross register tonnage is a figure obtained by measuring the entire sheltered volume of a ship available for cargo and passengers and converting it to tons on the basis of 100 cubic feet per ton; there is no stable relationship between GRT and DWT. *Ships by type* includes a listing of barge carriers, bulk cargo ships, cargo ships, chemical tankers, combination bulk carriers, combination ore/oil carriers, container ships, liquefied gas tankers, livestock carriers, multifunctional large-load carriers, petroleum tankers, passenger ships, passenger/cargo ships, railcar carriers, refrigerated cargo ships, roll-on/roll-off cargo ships, short-sea passenger ships, specialized tankers, and vehicle carriers. *Foreign-owned* are ships that fly the flag of one country but belong to owners in another. *Registered in other countries* are ships that belong to owners in one country but fly the flag of another.

Frequently Asked Questions

Answers to many frequently asked questions (FAQs) are explained in the Definitions and Notes section in *The World Factbook*.

Please review this section to see if your question is already answered there. In addition, we have compiled the following list of FAQs to answer other common questions.

General ::

Can you provide additional information for a specific country?

The staff cannot provide data beyond what appears in *The World Factbook*. The format and information in the *Factbook* are tailored to the specific requirements of US Government officials and content is focused on their current and anticipated needs. The staff welcomes suggestions for new entries.

How often is *The World Factbook* updated?

Formerly our Web site and the published *Factbook* were only updated annually. In November 2001, we began more frequent online updating and for many years bi-weekly updates were the norm. In late 2010 we began to update the online *Factbook* on a weekly schedule. The CIA discontinued publishing the printed *Factbook* after the 2007 edition; subsequent annual editions have been published by the US Government Printing Office.

Can I use some or all of *The World Factbook* for my Web site (book, research project, homework, etc.)?

The World Factbook is in the public domain and may be used freely by anyone at anytime without seeking permission. However, US Code (Section 403m) prohibits use of the CIA seal in a manner which implies that the CIA approved, endorsed, or authorized such use. For any questions about your intended use, you should consult with legal counsel. Further information on use of *The World Factbook* is described on the [Contributors and Copyright Information](#) page. As a courtesy, please cite *The World Factbook* when used.

Why are there discrepancies between *The World Factbook's* demographic statistics and other sources?

Although estimates and projections start with the same basic data from censuses, surveys, and registration systems, final estimates and projections can differ as a result of factors including *data availability, assessment, and methods and protocols*.

Data availability Researchers may obtain specific country data at different times. Estimates or projections developed before the results of a census have been released will not be as accurate as those that take into account new census results.

Assessment Researchers can differ in their assessment of data quality and in their estimates based on the available country data. They often need to adjust their estimates due to such factors as undercounting in a census or underregistration of births or deaths.

Methods and protocols Differences in methods and protocols can shape the way estimates and projections are made of fertility, mortality, and international migration, and how these data are integrated with the population data. For example, the US Census Bureau uses a model that projects the population ahead by single years of age, a single year at a time (population statistics used in the *Factbook* are based on this model), whereas the United Nations model projects five-year age groups forward, five years at a time.

Why doesn't *The World Factbook* include information on states, departments, provinces, etc., for each country?

The World Factbook provides national-level information on countries, territories, and dependencies, but not subnational administrative units within a country. A comprehensive encyclopedia might be a source for state/province-level information.

Is it possible to access older editions of *The World Factbook* to do comparative research and trend analysis?

Previous editions of the *Factbook* , beginning with 2000, are available for downloading - but not browsing - on the CIA Web site. Rehoused versions of earlier editions of the *Factbook* are available for browsing, as well as for downloading, at other Internet web sites. We urge caution, however, in attempting to create time series by stringing together economic data - especially dollar values - from previous editions of the *Factbook* . Over time, data sources, definitions, and economic accounting methods have changed. We occasionally have made these changes ourselves in order to provide our readers with the best information available. Also, in the case of dollar values, changes in relative exchange rates and prices may make trends difficult to comprehend. Therefore, individuals should consult additional resources when doing comparative research or trend analysis.

Would it be possible to set up a partnership or collaboration between the producers of *The World Factbook* and other organizations or individuals?

The World Factbook does not partner with other organizations or individuals, but we do welcome comments and suggestions that such groups or persons choose to provide.

Geography ::

Why can't I find a geographic name for a particular country?

The World Factbook is not a gazetteer (a dictionary or index of places, usually with descriptive or statistical information) and cannot provide more than the names of the administrative divisions (in the Government category) and major cities/towns (on the country maps). Our expanded , however, includes many of the world's major geographic features as well as historic (former) names of countries and cities mentioned in *The World Factbook*.

Why are Taiwan and the European Union listed out of alphabetical order at the end of the *Factbook* entries?

Taiwan is listed after the A-Z country entries because even though the mainland People's Republic of China claims Taiwan, elected

Taiwanese authorities *de facto* administer the island and reject mainland sovereignty claims. With the establishment of diplomatic relations with China on January 1, 1979, the US Government recognized the People's Republic of China as the sole legal government of China, acknowledging the Chinese position that there is only one China and that [Taiwan](#) is part of [China](#).

The [European Union](#) (EU) is not a country, but it has taken on many nation-like attributes and these may be expanded in the future. A more complete explanation on the inclusion of the EU into the *Factbook* can be found in the Preliminary statement.

Since we have an ambassador who represents the US at the Vatican, why is this entity not listed in the *Factbook*?

Vatican City is found under [Holy See](#). The term "Holy See" refers to the authority and sovereignty vested in the Pope and his advisors to direct the worldwide Catholic Church. As the jurisdictional equal of a state, the Holy See can enter into treaties and sends and receives diplomatic representatives. Vatican City, created in 1929 to administer properties belonging to the Holy See in Rome, is recognized under international law as a sovereign state, but it does not send or receive diplomatic representatives. Consequently, Holy See is included as a *Factbook* entry, with Vatican City cross-referenced in the Geographic Names appendix.

Why is Palestine not listed in *The World Factbook*?

The Palestinian areas of [Gaza Strip](#) and [West Bank](#) are listed in the *Factbook*.

Why are the Golan Heights not shown as part of Israel or Northern Cyprus with Turkey?

Territorial occupations/annexations not recognized by the United States Government are not shown on US Government maps.

Why don't you include information on entities such as Tibet or Kashmir?

The World Factbook provides information on the administrative divisions of a country as recommended by the United States Board on Geographic Names (BGN). The BGN is a component of the US Government that develops policies, principles, and procedures governing the spelling, use, and application of geographic names - domestic, foreign, Antarctic, and undersea. Its decisions enable all

departments and agencies of the US Government to have access to uniform names of geographic features.

Also included in the *Factbook* are entries on parts of the world whose status has not yet been resolved (e.g., West Bank, Spratly Islands). Specific regions within a country or areas in dispute among countries are not covered.

What do you mean when you say that a country is "doubly landlocked"?

A doubly landlocked country is one that is separated from an ocean or an ocean-accessible sea by two intervening countries. [Uzbekistan](#) and [Liechtenstein](#) are the only countries that fit this definition.

Why is the area of the United States described as "slightly larger than China" in the *Factbook* , while other sources list China as larger in area than the United States?

It all depends on whether one is looking at total area (land and water) when making the comparison (which is the criterion used by the *Factbook*) or just land area (which excludes inland water features such as rivers and lakes).

Total area (combining land and water)

United States = 9,826,630 sq km

China = 9,596,960 sq km

Land only (without any water features)

United States = 9,161,923 sq km

China = 9,326,410 sq km

Why has *The World Factbook* dropped the four French departments of Guadeloupe, Martinique, Reunion, and French Guiana?

The four entities are no longer in *The World Factbook* because their status has changed. While they are overseas departments of France, they are also now recognized as French regions, having equal status to the 22 metropolitan regions that make up European France. In other words, they are now recognized as being part of France proper. Their status is somewhat analogous to Alaska and Hawaii vis-à-vis the

contiguous United States. Although separated from the larger geographic entity, they are still considered to be an integral part of it.

Photos ::

Why do you not have pictures for every country?

Inclusion of photos in *The World Factbook* is a new feature that premiered with the unveiling of the redesigned online *World Factbook* in June 2009. This is a long-term project, and we plan to continuously add more photos to the site over time. Eventually, we hope to have images for every country in the *Factbook*.

Could you include photos of people from different locations around the world?

Factbook policy is to not include photos showing identifiable individuals.

I have great travel photos from my trips abroad. Can I submit them to your website to enhance your photo collection?

We appreciate the many offers from the public to contribute to our photo collection. However, we only use photos from US Government sources.

Spelling and Pronunciation ::

Why is the spelling of proper names such as rulers, presidents, and prime ministers in *The World Factbook* different than their spelling in my country?

The *Factbook* staff applies the names and spellings from the *Chiefs of State* link on the CIA Web site. *The World Factbook* is prepared using the standard American English computer keyboard and does not use any special characters, symbols, or most diacritical markings in its spellings. Surnames are always spelled with capital letters; they may appear first in some cultures.

Why does the spelling of geographic names, features, cities, administrative divisions, etc. in the *Factbook* differ from those used in my country?

The United States Board on Geographic Names (BGN) recommends and approves names and spellings. The BGN is the component of the United States Government that develops policies, principles, and procedures governing the spelling, use, and application of geographic names - domestic, foreign, Antarctic, and undersea. Its decisions enable all departments and agencies of the US Government to use uniform names of geographic features. (A *note* is usually included where changes may have occurred but have not yet been approved by the BGN). *The World Factbook* is prepared using the standard American English computer keyboard and does not use any special characters, symbols, or most diacritical markings in its spellings.

Why does *The World Factbook* omit pronunciations of country or leader names?

There are too many variations in pronunciation among English-speaking countries, not to mention English renditions of non-English names, for pronunciations to be included. American English pronunciations *are* included for some countries such as [Qatar](#) and [Kiribati](#).

Why is the name of the Labour party misspelled?

When American and British spellings of common English words differ, *The World Factbook* always uses the American spelling, even when these common words form part of a proper name in British English.

Policies and Procedures ::

What is *The World Factbook's* source for a specific subject field?

The *Factbook* staff uses many different sources to publish what we judge are the most reliable and consistent data for any particular category. Space considerations preclude a listing of these various sources.

The names of some geographic features provided in the *Factbook* differ from those used in other publications. For example, in Asia

the *Factbook* has Burma as the country name, but in other publications Myanmar is used; also, the *Factbook* uses Sea of Japan whereas other publications label it East Sea. What is your policy on naming geographic features?

The *Factbook* staff follows the guidance of the United States Board on Geographic Names (BGN). The BGN is the component of the United States Government that develops policies, principles, and procedures governing the spelling, use, and application of geographic names - domestic, foreign, Antarctic, and undersea. Its decisions enable all departments and agencies of the US Government to have access to uniform names of geographic features. The position of the BGN is that the names Burma and Sea of Japan be used in official US Government maps and publications.

Why is most of the statistical information in the *Factbook* given in metric units, rather than the units standard to US measure?

US Federal agencies are required by the Metric Conversion Act of 1975 (Public Law 94-168) and by Executive Order 12770 of July 1991 to use the International System of Units, commonly referred to as the metric system or SI. In addition, the metric system is used by over 95 percent of the world's population.

Why don't you include information on minimum and maximum temperature extremes?

The *Factbook* staff judges that this information would only be useful for some (generally smaller) countries. Larger countries can have large temperature extremes that do not represent the landmass as a whole.

What information sources are used for the country flags?

Flag designs used in *The World Factbook* are based on various national and vexillological sources.

Why do your GDP (Gross Domestic Product) statistics differ from other sources?

We have two sets of GDP dollar estimates in *The World Factbook*, one derived from purchasing power parity (PPP) calculations and the other derived from official exchange rates (OER). Other sources probably use one of the two. See the section on GDP and GDP methodology for more information.

On the CIA Web site, *Chiefs of State* is updated weekly, but the

last update for the *Factbook* was an earlier date. Why the discrepancy?

Although *Chiefs of State* and *The World Factbook* both appear on the CIA Web site, they are produced and updated on different weekly schedules. *Chiefs of State* includes fewer countries but more leaders, whereas *The World Factbook* has a much larger database and includes all countries.

Some percentage distributions do not add to 100. Why not?

Because of rounding, percentage distributions do not always add precisely to 100%. Rounding of numbers always results in a loss of precision - i.e., error. This error becomes apparent when percentage data are totaled, as the following two examples show:

Original Data Rounded to a whole integer

Example 1 43.2 43

30.4 30

26.4 26

100.0 99

Example 2 42.8 43

31.6 32

25.6 26

100.0 101

When this occurs, we do not force the numbers to add exactly to 100, because doing so would introduce additional error into the distribution.

What rounding convention does *The World Factbook* use?

In deciding on the number of digits to present, the *Factbook* staff assesses the accuracy of the original data and the needs of US Government officials. All of the economic data are processed by computer - either at the source or by the *Factbook* staff. The economic data presented in *The World Factbook*, therefore, follow the rounding convention used by virtually all numerical software applications, namely, any digit followed by a "5" is rounded up to the next higher

digit, no matter whether the original digit is even or odd. Thus, for example, when rounded to the nearest integer, 2.5 becomes 3, rather than 2, as occurred in some pre-computer rounding systems.

Why do you list "Independence" dates for countries such as France, Germany, and the United Kingdom?

For most countries, this entry presents the date that sovereignty was achieved and from which nation, empire, or trusteeship. For other countries, the date may be some other significant nationhood event such as the traditional founding date or the date of unification, federation, confederation, establishment, or state succession and so may not strictly be an "Independence" date. Dependent entities have the nature of their dependency status noted in this same entry.

Technical ::

Does *The World Factbook* comply with Section 508 of the Rehabilitation Act regarding accessibility of Web pages?

The World Factbook home page has a link entitled "Text/Low Bandwidth Version." The country data in the text version is fully accessible. We believe *The World Factbook* is compliant with the Section 508 law. If you are experiencing difficulty, please use our comment form to provide us details of the specific problem you are experiencing and the assistive software and/or hardware you are using so that we can work with our technical support staff to find and implement a solution. We welcome visitors' suggestions to improve accessibility of *The World Factbook* and the CIA Web site.

I am using the *Factbook* online and it is not working. What is wrong?

Hundreds of "*Factbook*" look-alikes exist on the Internet. You can access *The World Factbook* at: www.cia.gov, which is the only official site.

When I attempt to download a PDF (Portable Document Format) map file (or some other map) the file has no image. Can you fix this?

Some of the files on *The World Factbook* Web site are large and could

take several minutes to download on a dial-up connection. The screen might be blank during the download process.

When I open a map on *The World Factbook* site, it is fuzzy or granular, or too big or too small. Why?

Adjusting the resolution setting on your monitor should correct this problem.

Is *The World Factbook* country data available in machine-readable format? All I can find is HTML, but I'm looking for simple tabular data.

The *Factbook* Web site now features Country Comparison pages for selected *Factbook* entries. All of the Country Comparison pages can be downloaded as tab-delimited data files that can be opened in other applications such as spreadsheets and databases.

about :: copyright and contributors

The World Factbook is prepared by the Central Intelligence Agency for the use of US Government officials, and the style, format, coverage, and content are designed to meet their specific requirements.

Information is provided by Antarctic Information Program (National Science Foundation), Armed Forces Medical Intelligence Center (Department of Defense), Bureau of the Census (Department of Commerce), Bureau of Labor Statistics (Department of Labor), Central Intelligence Agency, Council of Managers of National Antarctic Programs, Defense Intelligence Agency (Department of Defense), Department of Energy, Department of State, Fish and Wildlife Service (Department of the Interior), Maritime Administration (Department of Transportation), National Geospatial-Intelligence Agency (Department of Defense), Naval Facilities Engineering Command (Department of Defense), Office of Insular Affairs (Department of the Interior), Office of Naval Intelligence (Department of Defense), US Board on Geographic Names (Department of the Interior), US Transportation Command (Department of Defense), Oil & Gas Journal, and other public and private sources.

The Factbook is in the public domain. Accordingly, it may be copied freely without permission of the Central Intelligence Agency (CIA). The official seal of the CIA, however, may NOT be copied without permission as required by the CIA Act of 1949 (50 U.S.C. section 403m). Misuse of the official seal of the CIA could result in civil and criminal penalties.

references :: guide to country comparisons

Country Comparison pages are presorted lists of data from selected Factbook data fields. Country Comparison pages are generally given in descending order - highest to lowest - such as Population and Area. The two exceptions are Unemployment Rate and Inflation Rate, which are in ascending - lowest to highest - order. Country Comparison pages are available for the following 58 fields in six of the nine Factbook categories.

Not all Country Comparisons include the same number of entries because information for a particular field is not available for all countries. In addition, not all data fields are suitable for displaying as Country Comparisons, such as those containing textual information. Textual information is more readily viewed by clicking on the Field Listing icon next to the Data field title.

All of the Country Comparisons' pages can be downloaded as tab-delimited data files and can be opened in other applications such as spreadsheets and databases. To save a Country Comparisons page in a spreadsheet, first click on the 'Download Datafile' choice above the Country Comparisons page you selected; then, at the top of your browser window, click on 'File' and 'Save As'. After saving the file, open the spreadsheet, find the saved file, and 'Open' it.

the World Factbook :: What's New

February 02, 2011 - What do the initials ESA stand for? Check out 'Appendix A: Abbreviations' to find out. New space-based photos have been uploaded for Australia, China, Namibia, Mexico, and the US.

January 25, 2011 - What country enjoyed the lowest unemployment rate in 2010? Find out by checking "Unemployment rate" under the Country Comparison feature (in the References tab). The entire Economy category has been updated to reflect data for years 2010 and earlier.

January 14, 2011 - Did you know that the highest elevation in the Netherlands is not in Europe? Where is it? Find out by checking the "Elevation extremes" field in the Geography section. New space-based photos have been added for Iran and Russia.

January 07, 2011 - What country flag is only one color? To find out visit the Flags of the World page.

December 30, 2010 - What airport handles the most passengers annually? Find out by going to the World entry, Transportation category, "Airports" field, and locating the top ten airports by passengers and by cargo.

December 23, 2010 - If it's noon in Washington, DC, what time is it in Nairobi, Kenya? The answer may be found in the Government section, under "Capital," where the time difference is specified. New photos from Kenya have been uploaded.

December 17, 2010 - How many rare earth elements (REEs) are there? Find the answer in the "Definitions and Notes" (below the References tab). These critical elements, necessary in so many of today's high-tech industries, are now listed in the "Natural resources" field, under Geography, for countries that are producing REEs or initializing mining operations (including Australia, China, Russia, South Africa, and the US).

December 10, 2010 - Quick! What's the national anthem of Australia? Now you can find the name, lyricist, composer, and additional basic anthem info for every country in the world by visiting the new "National anthems" field in the Government section of the Factbook.

November 30, 2010 - Since 2004, The World Factbook Web site has been updated on a bi-weekly schedule. Culminating a three-month

trial effort, we are pleased to announce that the Factbook will now be updated on a weekly basis.

November 19, 2010 - Significant updates entered under the People, Government, and Communications categories.

November 11, 2010 - In the Geography category, a new subfield, "volcanism," has been added under the "Natural hazards" field for countries with historically active volcanoes. The Economy section has been updated to reflect the most recent data for 2009 and earlier years.

November 05, 2010 - In the Economy category, the "Oil - exports," "Oil - imports," "Oil - proved reserves," and "Natural gas - proved reserves" fields have been updated with the most recent estimates available.

October 29, 2010 - In the People category, significant updates have been made to the "School life expectancy" and "Education expenditures" fields. In the Economy category, the "Stock of domestic credit" field has been updated to include data for 2009. In addition, the definition has been expanded to include credit provided by all financial institutions, not just banks, as had been The World Factbook practice until now. For some countries this change significantly broadens the coverage.

October 22, 2010 - The dissolution of the Netherlands Antilles has resulted in two new World Factbook entries: the autonomous entities of Curacao and Sint Maarten (the remaining three islands - Bonaire, Saba, and Sint Eustatius - have joined the Netherlands as special municipalities). The number of entities in The World Factbook now stands at 267.

October 13, 2010 - In the Economy category, the "Stock of money" and "Stock of quasi money" fields have been updated and renamed as "Stock of narrow money" and "Stock of broad money" in keeping with the International Monetary Fund's new presentation of monetary data. This new format provides greater standardization of reporting and permits more consistent comparisons across countries. Please see "Definitions and Notes" (under the References tab) for descriptions of the new fields.

October 08, 2010 - In the Communications category, the "Internet hosts" field has been updated with 2010 data; significant updates entered in the Geography, Government, and Military categories.
